Annual Reports

OF THE

CITY OF MANCHESTER,

FOR THE

YEAR 1868.

MANCHESTER, N. H., 1868.

TWENTY-THIRD

ANNUAL REPORT

OF THE

Receipts and Expenditures

OF THE

CITY OF MANCHESTER,

FOR THE FISCAL YEAR ENDING DECEMBER 31,

1868,

TOGETHER WITH OTHER ANNUAL REPORTS AND PAPERS RELATING
TO THE AFFAIRS OF THE CITY.

MANCHESTER, N. H.:

PRESS OF THE MANCHESTER DAILY NEWS,—HENRY A. GAGE, PRINTER.

1869.

VALEDICTORY ADDRESS

OF THE

Hon. James A. Weston,

MAYOR,

TO THE

CITY COUNCIL OF MANCHESTER,

DELIVERED

BEFORE THE TWO BRANCHES IN CONVENTION, JANUARY 5, 1869.

CITY OF MANCHESTER,

IN CONVENTION OF THE CITY COUNCIL,

ORDERED, That three hundred copies of the Valedictory Address of Hon. James A. Weston, Mayor, delivered this day, before the two branches of the City Council in Convention, be printed for the use of the City Council, and that his Honor, the Mayor, be requested to furnish a copy to be printed in the Annual Reports.

Read and passed.

January 5, 1869.

JOSEPH E. BENNETT, CITY CLERK.

ADDRESS.

GENTLEMEN OF THE CITY COUNCIL:

The period for which we assumed the trusts imposed upon us one year ago, being about to close, it seems eminently proper, and not without precedent, that I should present a brief review of our official acts, setting forth what has been accomplished within the year, with a statement of the condition of the City affairs, as the management thereof is relinquished to others. Our successors, who are to carry forward the enterprises and improvements now in progress, are fairly entitled to this information; and it is a matter of justice to us, as well as to our fellow citizens generally, that such a statement should be made.

The propriety and even importance of this course cannot fail to commend it to every business man; and I can but hope that it will be considered the duty of each succeeding City Council to transmit to its successors, an explicit account of the condition of affairs at the expiration of its term of office.

FINANCE.

On the first day of January 1868 the net indebtedness of the City as stated in my inaugural address, from information furnished by the City Treasurer, was \$393,805 50

The following statement obtained from the same source, and made up on the same basis, shows the net indebtedness of the City, January 1, 1869, 369,112 24

Being a decrease or reduction of the debt during the year, of \$24,693 26

The statement from the Treasurer's books, is as follows:

Amount of funded debt, January 1, 1868,	\$351,900 00
Amount of temporary loan January 1, 1868,	\$35,230 00
Amount of increase during the year,	2,071 00
Present amount of temporary loan,	37,301 00
Estimated amount of interest now due,	\$10,000 00
Unpaid bills now due	15,156 08
	<hr/>
	25,156 08
Total debt and interest January 1, 1869,	\$414,357 08
Deduct amount of cash on hand,	\$42,794 85
Deduct note due on Barrett place	75 00
Deduct notes due for lots sold from City Farm,	2,375 49
Amounting to	<hr/>
	\$45,245 34
Leaving the net indebtedness January 1, 1869,	<hr/>
	\$369,111 74

Included in the foregoing statement is the sum of \$5,468 43, paid for furnishing and fitting up the Court House and lot, which was authorized to be met by loan; but was taken from the tax receipts. In all, the sum of \$15,994 16 has been paid from the receipts, on account of the Court House, above the sum raised by loan, rather than hire money, while sufficient funds were remaining in the Treasury. And notwithstanding this, there is now in the City Treasury, the sum of \$42,794 85, which is a larger cash balance than was ever before on hand at the close of any municipal year.

No bills have been contracted for our successors to provide for, and efforts having been made by advertising in the daily papers and otherwise, to have every outstanding claim presented for payment at the close of the year, it is confidently believed that the demands against the City are adjusted as fully as it is practicable to do, at any given time.

The report of the Joint Standing Committee on finance, will reveal the gratifying fact that there is not a single account overdrawn, while many of them will show large unexpended balances.

SEWERS AND DRAINS.

As a part of a systematic plan of sewerage recommended in Slade's report, the proposed new sewer in Elm Street has been

commenced, and extended from Central to Merrimack Street, a distance of about five hundred feet. This sewer is of brick, three feet high by two feet wide in the clear, and laid at such a grade as will, in connection with the old sewer, furnish ample means of drainage for the surface water, as well as for sink drains and cellars.

A cement sewer has also been laid, which discharges into this new sewer, and extends from Merrimack to Spring Street, through the back street west of Elm Street, a distance of about sixteen hundred feet. Several other sewers of less magnitude have been constructed in various parts of the City. The claims which were found hanging over the City for damage to property in consequence of alleged defects and obstructions in the stone culvert leading from Hanover to Merrimack Squares induced a thorough examination into the case.

The result was a compromise between the parties by which those who were damaged, relinquished one third part of their claims on the condition that the City would enlarge and repair the culvert agreeably to certain stipulations.

This has been accomplished to the satisfaction of all concerned. The claims have all been adjusted and paid, and any liability of the City on account of any further damage arising from a like cause, has ceased beyond question.

Much inconvenience having arisen, and unnecessary expense incurred from a want of knowledge as to the location, capacity, &c., of existing sewers, a survey has been made, and a plan is in progress which is designed to furnish all the desired information.

HIGHWAYS.

The new highways constructed during the current year are as follows:—The extension of Union Street, north—the extension of Merrimack Street from Hall Street to its intersection with Hanover Street—Willow and Young Streets near the jail—Granite Street from Canal to Elm Street and Bridge Street, from Hall Street through the City Farm to the Mammoth road. In consequence of the unfavorable weather in the fall, the work on Nashua, Ash, and Walnut Streets was not quite completed. Some additional work will also be necessary on Bridge Street the coming season.

The sidewalk on the north side of Hanover Street has been wid-

ened four feet, from Elm east back street to Union Street and a walk of concrete or brick laid the entire distance at the expense of the city. The sidewalk on the south side of Hanover Square, has also been widened and a concrete pavement laid to make it correspond with that below; one half the expense of the last named walk, exclusive of grading, was contributed by residents in that vicinity. The total expense incurred in the construction of the streets, and walks above named, is about \$4,000. The plan of laying concrete walks in the commons, has been inaugurated by the construction of two walks on Concord Square. Early in the season Granite Bridge was thoroughly replanked and otherwise repaired and painted. The plank used were of oak, four and a half inches thick; and although the first cost of this material was considerably more than that of other kinds would have been, it is believed the line of true economy was adopted.

CITY FARM.

A complete survey and plan of the City Farm has been made, and the westerly portion of the same divided into house lots, by projecting the necessary streets. Seven of these lots have already been sold and conveyed, at prices fixed by your Committee, amounting to the sum of \$3,167 34. About seventeen acres in all have been offered for sale, which, at the prices agreed upon, will amount to about \$11,000. The opening of Bridge Street was mainly for the purpose of bringing these lands into the market.

RESERVOIRS.

The construction of two Reservoirs in sections of the city, destitute of these facilities for the extinguishment of fires, has contributed much to the safety of the property in the neighborhood of their location. Both of them are built entirely of stone, in the most durable manner. The one on Wilson Street, in Janesville, is 27 x 6 x 6 feet, in the clear, and being situated on a never failing brook is always full of water. The other situated on Merrimack Street, near Hall Street, is in the clear 40 x 6 x 6 feet, which, it is thought, will furnish a supply of water adequate to any demand likely to occur in that locality.

LIBRARY BUILDING.

The City Council having made an appropriation towards the erection of a Library Building, a committee was appointed sometime in the summer months, with authority to procure plans, specifications and estimates of such a building as in their judgment would meet the present and prospective requirements of the City, and report to the City Council. Subsequently, the committee were authorized to adopt such a plan as they deemed advisable, and to proceed with the work so far as to lay the foundation. After a careful consideration of the whole matter, a plan was agreed upon with much unanimity. The building proposed is in the gothic style of architecture, 49 x 90 feet, with a tower at the southwest corner. It has a high posted basement, to be used for miscellaneous purposes, and one principal story, containing a waiting room, Librarian's rooms and a library room of sufficient size to accommodate 44,000 volumes. It is proposed to locate the building on the lot of land immediately south of Franklin Street church, having a frontage on Franklin of 145 feet. The south side of the lot is to be on a line with the passageway south of the Methodist Church, the intention being to make a public avenue from Elm Street to Franklin Street, for foot passengers through this walk.

This lot is generously donated by the Amoskeag Manufacturing Company, and the deed is ready to be delivered as soon as the aforesaid avenue can be laid out as a public way. Owing to unavoidable delays arising from various causes, the Committee were unable to make any progress with the foundations, but the preliminaries are so far advanced that the work may be commenced early the coming season.

POLICE STATION.

Agreeably to the recommendation contained in my inaugural address, some progress has been made with a view to procure better accommodations for the Police Department. An architect, Mr. G. W. Stevens, has been employed, who has presented a plan for an addition to, or an extension of the City Hall Building at the south

west corner. It is proposed to make the structure 34 x 40 feet, one story high with a basement, all finished in the same style of architecture as the main building, and of the same kind of materials. It is to contain rooms for the Marshal, and a watch room, with the necessary conveniences, also twenty cells, ten in the basement and ten in the principal story.

I have thus adverted to some of the principal topics relating to our public affairs which have been the subject of our deliberations during the past year. Whatever success has resulted from our labors has in a large degree been owing to your wisdom, fidelity and cheerful co-operation. As a reward for your services, you have the approbation of your fellow citizens, and that which is higher and better than all, the consciousness of having honestly endeavored to perform your duty.

The prosperity which has marked the progress of our city throughout the year, may well awaken our warmest gratitude to an ever kind and watchful Providence. Peace and public order have been maintained to a high degree: no pestilence which walketh in darkness has been suffered to come within our borders; the Republic has made rapid progress in recovering from the effects of the dreadful calamities incident to the long and bloody war; public confidence has been greatly restored, the spirit of enterprise in our people has been stimulated, the busy hum of industry has been heard, labor has been rewarded, and our city is once more entering upon a career of prosperity with renewed vigor.

GENTLEMEN: Before we separate, allow me to extend to you individually, my sincere and heartfelt thanks for the courtesy and kindness which has ever characterized your conduct in all relations with me. Let me assure you that I shall never cease to retain pleasing and grateful recollections of the many manifestations of your generosity and personal regard; and that wherever your lot may be cast, I shall always cherish an ardent wish for your future success and happiness.

GOVERNMENT AND OFFICERS
OF THE
CITY OF MANCHESTER,
1868.

MAYOR,

JAMES A. WESTON.

ALDERMEN,

WARD 1, William G. Perry.	WARD 5, Daniel Connor.
WARD 2, Ezra Huntington.	WARD 6, Joseph Rowley.
WARD 3, William P. Newell,	WARD 7, Chauncey C. Favor,
WARD 4, Horace B. Putnam.	WARD 8, George H. Gerry.

COMMON COUNCIL.

WARD 1, Henry C. Sanderson, John Plummer, William Bursiel.	WARD 4, A. M. Eastman, Benj. W. Robinson, Jonathan B. Moore.
WARD 2, John Pattee, Henry A. Farrington, Henry Lewis.	WARD 5, George Fox, Andrew Farrell, Michael Keeley,

A. A. Partridge,
Hiram Stearns,

Joseph E. Bennett, *City Clerk.*

Henry C. Sanderson, *President of Common Council.*

Horace M. Gillis, *Clerk of Common Council.*

Harrison D. Lord, *City Messenger.*

JOINT STANDING COMMITTEES.

On Finance.—Messrs. Chandler, Corning and Farrington; the Mayor and Alderman Perry.

On Accounts.—Aldermen Huntington and Rowley; Messrs. Sanborn, Lewis of Ward 7, and Chandler.

On Lands and Buildings.—Aldermen Connor and Putnam; Messrs. Plummer, Pattee and Bursiel.

On Public Instruction.—Aldermen Gerry and Huntington; Messrs. J. H. Brooks, Lewis of Ward 2, and Eastman.

On Streets.—Aldermen Newell and Rowley; Messrs. Corning, Sleeper and Silver.

On City Farm.—The Mayor and Aldermen Favor; Messrs. Robinson, Plummer and Stearns.

On Sewers and Drains.—Aldermen Newell and Connor; Messrs. Silver, Robinson and Eastman.

On Commons and Cemeteries.—Aldermen Perry and Gerry; Messrs. Hubbard, J. H. Brooks and Partridge.

On Fire Department.—Aldermen Huntington and Gerry; Messrs. Farrington, Plummer and Samuel Brooks.

On Claims.—Aldermen Perry and Putnam; Messrs. Pattee, Lewis of Ward 7, and Eastman.

On House of Correction.—Aldermen Connor and Favor; Messrs. Messer, Fox and Samuel Brooks.

On Military Affairs.—Aldermen Putnam and Favor; Messrs. Hubbard, Bursiel and Farrell.

On City Hall Building.—Aldermen Rowley and Newell; Messrs. Moore, Sanborn and Lewis of Ward 2.

STANDING COMMITTEES IN BOARD OF ALDERMEN.

On Licenses.—Aldermen Gerry and Connor.

On Enrollment.—Aldermen Rowley and Gerry.

On Lighting Streets.—Aldermen Favor and Rowley.

On Bills in Second Reading.—Aldermen Perry and Putnam.

On Market.—Aldermen Connor and Favor.

On Setting Trees.—Aldermen Putnam and Newell.

On Marshal's Accounts.—Aldermen Newell and Huntington.

On Abatement of Taxes.—Aldermen Huntington and Perry.

STANDING COMMITTEES IN BOARD OF COMMON COUNCIL.

On Elections and Returns.—Messrs. Sleeper, Partridge and Samuel Brooks.

On Bills in Second Reading.—Messrs. Corning, Messer and Moore.

On Enrollment.—Messrs. Chandler, Eastman, and Lewis of Ward 7.

INAUGURAL ADDRESS

OF THE

Hon. Isaac W. Smith,

MAYOR,

TO THE

CITY COUNCIL OF MANCHESTER,

DELIVERED

BEFORE THE TWO BRANCHES IN CONVENTION,

JANUARY 5, 1869.

CITY OF MANCHESTER.

AN ORDER TO PRINT THE MAYOR'S INAUGURAL ADDRESS.

ORDERED, If the Board of Common Council concur, That the City Clerk be hereby authorized to procure the printing of three hundred copies of the Inaugural Address of the Hon. Isaac W. Smith, delivered this day before the several branches of the City Government, for the use of the City Council.

In Board of Mayor and Aldermen, January 5, 1869.

Read and passed.

J. E. BENNETT, CITY CLERK.

In Board of Common Council, January 5, 1869.

Read and passed.

H. M. GILLIS, CLERK.

ADDRESS.

GENTLEMEN OF THE CITY COUNCIL:

While the oath of office is still fresh upon our lips, let us acknowledge our profound gratitude to God, that, during the year that has just closed, peace and good order have been maintained in our midst; that pestilence has not desolated our homes, nor conflagration laid waste our dwellings; that prosperity has smiled upon our efforts, and success attended the various individual and corporate enterprises of our beloved city. And let us humbly invoke His continuance of these blessings during the year upon which we have entered.

Called by the suffrages of our fellow-citizens to the discharge of the several trusts committed to us, we are all fully sensible, I have no doubt, of the responsibilities we have assumed.

In conformity to the requirements of the statute, as well as in accordance with the custom of my predecessors, I shall attempt to bring to your attention at this time, some of the more important matters that will require consideration at your hands. I can only do so, however, on this occasion, in a general way. When I shall have had sufficient opportunity to become more familiar in detail with the condition and wants of the city, such further suggestions will be made, from time to time, as may be of sufficient importance to be made the subject of special communications.

FINANCES.

Through the courtesy of the City Treasurer, I have been furnish-

ed with the following exhibit of our financial condition on the first day of January, 1869:

Bonds due April 1, 1870	\$8,800 00
“ “ Jan. 1, 1871	6,000 00
Notes “ Feb. 28, 1872	3,600 00
Bonds “ July 1, 1872	20,000 00
“ “ July 1, 1874	20,000 00
“ “ July 1, 1877	22,500 00
Notes “ July 9, 1878	2,400 00
“ “ July 22, 1878	1,100 00
Bonds “ Jan. 1, 1880	10,000 00
“ “ July 1, 1882	22,500 00
“ “ April 1, 1884	70,000 00
“ “ April 1, 1885	10,000 00
“ “ Jan. 1, 1888	35,000 00
“ “ Nov. 1, 1893	70,000 00
“ “ July 1, 1894	50,000 00
							<hr/>
Total funded debt	\$351,900 00
Temporary loan	37,301 00
Estimated interest to Jan. 1, 1869	10,000 00
Outstanding bills Jan. 1, 1869	15,156 08
							<hr/>
Total debt and interest	\$414,357 08
Cash in Treasury, Jan. 1, 1869	\$42,794 85

Farm lots sold	2,450 49
Estimated interest on same	47 00
							<hr/>
	\$45,292 34

Net indebtedness, Jan. 1, 1869 . . . \$369,064 74
 which is \$6,973 92 less than one year ago, as per statement of the city debt on page 167 of the Annual Reports of the city for 1867: or \$23,923 92 less than one year ago as per statement of my predecessor in his inaugural address, which seems to be correct, he having included as a debt against the city, the sum of \$16,950, due for steam fire engine and the Court House,—two items not included in the statement of the city debt in the Annual Reports.

The amount of taxes for 1868, uncollected, is about \$28,000, of which \$20,000 is deemed collectible. The amount uncollected is about \$7,000 less than remained uncollected one year ago on the list for 1867.

By an act of the last Legislature, which took effect in September, the several school districts of this city were abolished, the property of the school districts becoming the property of the city, and their liabilities being assumed by the city.

The debt of School District No. 2 amounts to \$17,200, the interest upon which is paid to June 1, 1869, and is due in equal amounts to the four savings banks of the city.

The debt of School District No. 7 is \$742 70, with interest since October 15, 1868.

No debt, as I am informed, existed against the other nine school districts of the city. With the addition of the debts of these two school districts, our net indebtedness is \$387,007 44.

The accounts kept by the City Clerk show that the sum of \$278,139 64 was paid for bounties to soldiers enlisted from this city in the late war, including bounties advanced for the general government, and the sum of \$7,391 63 was paid for "State Aid" to families of soldiers, making a total of \$285,531 27 (in addition to the amounts hitherto refunded), or about seventy-five per cent. of our indebtedness, created in consequence of the demands made upon us for soldiers to suppress the late rebellion, but little, if any, of which will ever be refunded.

How to rid the city of this great indebtedness, the annual interest upon which (\$24,000) is a heavy burden, and a serious obstacle to our forwarding any of the many important enterprises for advancing the interests of our city awaiting our action, is a problem demanding our serious consideration. This item of interest is constantly undermining our means for enterprise and usefulness. It is continually accumulating, day and night, in sunshine and storm, on the Sabbath as well as on week days, while we sleep and while we labor, silently, yet with unmistakable certainty.

Some of our wealthiest citizens and heaviest tax-payers, with whom I have conversed, favor raising a sufficient amount to pay off the whole debt within a very short period, arguing that the property of every tax-payer will thereby be immediately advanced

in value, and that our city will by reason thereof attract wealth for investment within our limits, and a large increase in the number of people who take up their abode with us.

Others are in favor of paying little or nothing of the principal at present, but would leave it for posterity, arguing that the present generation has done its full share in furnishing men and money to suppress the late rebellion.

I cannot agree with either of these classes in their views. While it is true that posterity should bear its due proportion of expenditures for improvements in which it will be equally benefited with us, yet it is equally true that posterity will have its duties to perform, and extraordinary emergencies to meet. Besides, it is a little difficult to fix the exact point of time when any generation is willing to admit itself *the* posterity looked forward to by any preceding generation to liquidate such claims upon it.

Nor does there seem to be any such urgent necessity as that we should in a very short period clear away so large an amount of indebtedness as exists against us to-day. I think, however, we should be derelict in our duty to ourselves if we fail to take advantage of the present general success and prosperity that prevails, to remove a portion of the load of debt that is upon us. Our mills are generally doing a satisfactory business, individual enterprise is flourishing, money is abundant, and labor is in demand and receiving adequate reward. We can raise and pay this year twenty-five thousand, and probably fifty thousand, dollars of our debt, with greater ease than even one thousand dollars a few years hence, should a financial revulsion sweep over the land, as many intelligent men suppose inevitably must.

I think we should raise the present year, for this purpose, at least twenty thousand dollars, perhaps twenty-five thousand. This amount would not be burdensome, and at that rate our debt would be extinguished in from sixteen to twenty years, the interest, of course, growing less with each payment of the principal. Whenever it shall occur that none of the debt shall fall due in any given year, still this amount should be raised and invested as a sinking fund, to be applied to the payment of the debt when due.

But no effort to remove the load of our debt will fully avail, unless we pay our usual and ordinary expenses in full from year to

year. If they are suffered to fall behind a few thousand dollars each year, any progress made in paying the debt is counterbalanced to the same extent. Let us, therefore, consider carefully before we make our appropriations, and as accurately as possible, the amount necessary to be raised for meeting the wants of the city for the year, reducing our expenses to the lowest point compatible with our necessities and consistent with true economy, making all due allowance for contingencies that must inevitably occur; and, having made the appropriations, let us adhere inflexibly to the idea that the expenditures shall not exceed the same.

We should not lose sight, however, of the fact that extraordinary emergencies may occur, to two of which I shall presently ask your attention, when it may not only be the part of wisdom, but also be true economy in us to incur further debts; but this should only be for objects permanent in themselves and of a character remunerative, either directly in themselves or indirectly in their results upon the community. And when such an occasion shall arise, I would advise that the bonds of the city be issued payable in a given number of equal annual installments according to the magnitude of the debt incurred; for example, a debt of \$30,000 should be paid in, say, ten years, in equal annual installments of \$3,000, and the bonds should have designated upon their margin the object for which the debt was incurred, such as "Suncook Valley R. R. Loan," "City Aqueduct Loan," &c. The debt would thus be paid in easy installments without being perceptibly felt as a burden, and would be in sure process of liquidation.

SCHOOLS AND SCHOOL HOUSES.

By the change in the law above referred to abolishing the school districts of the city, the building and repairing of school-houses will hereafter devolve upon the city. During the past year the houses in the central part of the city, with the exception of the second story of the Spring-street house, were put in thorough repair, at an expense of about \$10,000. For the condition of the several school-houses and the repairs necessary to be made during the present year, I refer you to the Report of the Superintendent

of Schools. It is economy to keep these houses at all times in good repair, as well as indispensable to the health and comfort of pupils and teachers.

Three divisions of a new Grammar school have recently been established in the new High-school house, to relieve the crowded condition of the other Grammar schools and to accommodate the growth of that section of the city. The fourth division would also have been established before this time, thus making it a full Grammar school, had there been suitable rooms for the same in the house. Some immediate action should be taken to provide suitable accommodation for this school, either by providing temporary accommodations in the High-school house or by the erection of a new building in that section of the city.

The High-school building was not constructed for the use of a High and Grammar school, and although it is larger than the present wants of the High school require, it is nevertheless badly arranged for the two schools, and if so occupied, neither would be properly accommodated. Should you come to the conclusion that it would be better to erect a new Grammar-school house in that section of the city, the three lots now used at Towlesville, at the corner of Bridge and Union streets, and at the corner of Concord and Beech streets, should be sold, and the proceeds of the sale be applied towards defraying the expense of a new house and lot.

The money to defray the expense of supporting our public schools is raised and appropriated by the City Council by taxation, while the Board of School Committee alone has charge of its expenditure. It has frequently happened that the money thus appropriated has been all expended by the School Committee some time prior to the expiration of the financial year, and the schools supported for the balance of the year out of the appropriation for the next succeeding year. I am informed that the appropriation of last year was all expended, and that there are outstanding bills amounting to \$2,000, in addition to the salaries of the teachers for December, amounting to about \$3,000 more, and the bill for wood and coal consumed prior to the 1st inst., the amount of which I am unable to furnish. From this divided responsibility, it is not surprising that this result should occur, the City Council feeling that its duty is ended by appropriating the amount asked for by the

School Committee, and the latter board, being elected rather with a view to qualifications for the management of the schools than for financial reasons, not naturally feeling that degree of responsibility as if charged with the appropriation as well as the expenditures of the funds. In many cities the Mayor is by law made a member *ex officio* of the School Committee, as the representative of the City Council by whom the money is appropriated. The responsibility for its expenditures by the Board of School Committee thus constituted would undoubtedly be more fully realized. My experience as a member of that committee a few years since induces me to suggest that the Board might profitably be enlarged to double its present number, each ward electing annually one member for the term of two years. The Board would thus always have at least one-half of its number members of experience. Should these suggestions meet with approval, the legislature at its next session would undoubtedly amend our charter accordingly.

Before dismissing this subject I trust I shall be pardoned for making a suggestion which may almost seem unnecessary. Our schools should be upon a footing of perfect equality,—without distinction in the rank, circumstances, or color of the pupils,—without discrimination for or against any sect, party, or denomination,—open alike to the children of native, and foreign born who take up their homes in our midst,—and with the best teachers that can be secured, with regard only to character and qualifications.'

The General Statutes of the State take the appointment of truant officers from the Board of School Committee, where it was formerly vested, and place it in the hands of the City Council. The Superintendent of Schools, in his Annual Reports of last and this year, has called attention to the subject of truancy, as being a growing and serious evil and requiring some action at your hands. It is cheaper as well as better, to educate a child and thus prevent his going astray, than to support him in confinement and attempt to reform him later in life. I commend the Report of the Superintendent upon this subject to your favorable consideration.

CITY LIBRARY.

Both of my immediate predecessors, in their inaugural messages, called attention to the subject of erecting a City Library building. Encouragement was given two years ago that the lot on Franklin street, south of the Franklin-Street Church, would be conveyed to the city for that purpose without expense, and that one-half the expense of the building would be contributed by gentlemen residing without our limits. The building of the Court House that year necessarily delayed action upon the subject till late in the season, when, owing to the then depressed condition of manufactures, and to some other causes, the same encouragement of donations from abroad could not be held out. The City Council of last year appropriated the sum of \$5,000 towards the erection of a building, and appointed a committee of the City Council, together with Hon. Frederick Smyth, Hon. E. A. Straw, and Samuel N. Bell, Esq., with power to procure and adopt a plan for a building and to commence the work. I learn from my predecessor, that the committee adopted a plan from several which were submitted to them, and intended to put in the foundation last Fall. But several unforeseen and unavoidable causes operated to delay the action of the committee, and operations were therefore, necessarily delayed till the opening of the coming Spring. The estimated expense of the building is \$25,000, which can be diminished or increased according to the style and expense of finish adopted. Strong encouragement has been given to me that at least one-half, and perhaps more, of the expense of the building will be donated by gentlemen residing without our limits, interested in the success and prosperity of our city. If our anticipations in this particular are realized, there would remain the sum of \$12,500 only, to be paid by the city, of which sum \$5,000 appropriated by the last City Council remains unexpended in the City Treasury. I would recommend that you appropriate the sum of \$7,500 for this purpose, and that the work be proceeded with the coming Spring, as soon as the condition of the ground and weather will permit. The Amoskeag Manufacturing Company, with its accustomed liberality, will convey the lot, free of expense, to the trustees, as soon as the avenue known as

Methodist Court shall be extended to Franklin street, and laid out by the city as a public avenue, for which a petition has been presented to the Board of Aldermen, and in regard to the desirableness and expediency of which there can be no question.

Our City Library contains at the present time 13,500 volumes. It was almost totally destroyed by fire in 1856, and is now necessarily located in a building used for other purposes. It should not be exposed to the hazard of a second destruction by fire. A proper regard for its safety, as well as for the accommodation of our citizens, requires that it should be located in a building occupied for that, and no other purpose, as near fire-proof as possible, at the earliest practicable moment.

The reports of the Librarian and officers of the Library have been made, and will soon be before you in print. They show its affairs to be well managed and in competent hands. It needs no words of mine to convince you of its usefulness. It is realizing the hopes that were entertained when it was established, and I commend it to your careful and favorable consideration.

WATER.

The introduction of pure water into the city has been for many years a subject much discussed, and generally considered as certain of being accomplished. Of the different plans proposed, that of bringing it from Massabesic Pond, a distance of about four miles, seems to be the most feasible, and by means of a corporation for that purpose, the most practicable. Such a corporation was organized last year under a charter from the Legislature, and is in the hands of men in whose integrity and capacity for good management the community has confidence. It is not improbable that this undertaking may be commenced the present year. By the terms of the charter, the city has the power to subscribe to its capital stock to an amount not exceeding one-half thereof. The stock could probably be taken up without the aid of the city. But in an enterprise of such magnitude and importance, and affecting so largely the health and comfort of our citizens, and affording such additional security against fire, it would be advisable that the city

should be interested to an amount sufficient to give it a leading voice in its management.

The sum of one hundred and fifty thousand dollars would probably be sufficient to put the works into operation, further expenditures being required as the works are extended. I have no hesitation in advising that the city should subscribe to at least \$50,000 of the stock, both on the ground of promoting the health and comfort of its inhabitants and as additional security against fire, as well as because there can hardly be a doubt that the investment will be remunerative.

RAILROADS.

During the past year the City Council, agreeably to a petition signed by a large number of the prominent men of this city, many of them our heaviest tax-payers, and representing all the different interests of the city, voted the sum of \$50,000 to aid in the building of the Suncook Valley Railroad. This sum, with that voted by other towns, and raised from other sources, will ensure the building of this road during the coming season. That the opening of this new avenue of travel to that flourishing section of the State, will attract much of its trade and business to this city, to the mutual advantage of the people of both sections, and that this outlay of the city will be received back many times by its citizens, cannot be questioned.

Your attention will probably be called at an early day to the subject of extending similar aid to the Manchester and Keene Railway. No other railway leading to this city would probably add so much to the business and trade of the city as this. Very much of the travel over the road would be that of people coming to this city upon business and not merely passing through it.

There seems to be no reasonable doubt that with our aid, and the amount that would be raised in New Boston and Francestown, this road would be built from Parker's Station in Goffstown to Francestown, near the line of Greenfield, and when opened to that point its extension to Peterborough can hardly be said to be a question of time. I need not detain you to recite the advantages that

would result from the opening of this line of travel and freight. The wishes and opinions of our constituents upon this subject will no doubt be publicly made known to us as soon as the movements of those who have this enterprise in charge shall seem to warrant the commencement of operations.

FIRE DEPARTMENT.

I doubt whether any city of the size of ours has a better or more efficient Fire Department. Fortunately its services have been but seldom required for the past year, yet its reputation for good management and vigilance is in no manner diminished.

We have been particularly fortunate for the past few years in our exemption from the ravages of fire. No large or destructive conflagration has swept away our dwellings, stores and workshops as in many of our sister cities. Our exemption in this respect, although owing in great measure to the efficiency of our Fire Department and the abundant caution we have exercised in guarding against fire, nevertheless seems almost miraculous. Like exemption in future can only be secured by the exercise of equal vigilance in maintaining the efficiency of the department. The city is generally well supplied with reservoirs. But that section east of Union street, except so much as can be reached from Hanover Square, from the nature of the ground cannot be supplied with reservoirs, and it is, therefore, peculiarly exposed to the ravages of fire. There does not seem to be any way of remedying this evil, until the city is supplied with water from the Aqueduct Company.

If there is further security within our reach, it is certainly our duty to provide it without delay.

HIGHWAYS AND STREETS.

It is too apparent that there has been a great lack of system in the construction of our sidewalks and the repairs of our streets. The sidewalks have generally been constructed by the abutters and

often without regard to grade, while much of the money expended in the repairs of the streets has been wholly thrown away. Gravel, or some poorer substitute, has been drawn upon many of the streets by successive surveyors, till the streets have been raised higher than the sidewalks, and often the greensward between the sidewalk and traveled path, seemingly placed there by nature as a protection against dust and drouth, has been dug up and drawn away.

I would suggest whether it is not highly important that there be some further legislation by the city in regard to establishing the grade of the streets and sidewalks, a public record of the same being preserved, and that adherence to the grade thus established be enforced. The grade should be established by a competent civil engineer, and not be left to the caprice of every successive highway surveyor.

Great improvement has recently been made in our sidewalks. By the widening of Hanover street last year, a sidewalk was secured of ample width to accommodate the travel of that frequented avenue. I would recommend that suitable encouragement be extended by the city, as heretofore, to all abutters who will improve sidewalks adjoining their premises.

The paving of Elm street, which has been extended during the past year, has proved a complete success. It should be continued from year to year till completed. The repairs upon the principal streets leading from Elm street, as far east at least as Union street, should be made with a view to the streets being ultimately paved. Although costing more in the first instance, yet when completed the work is permanently done, and no further outlay for repairs will be needed for many years to come.

The two bridges across Merrimack river are believed to be in good repair, and will not require any extraordinary outlay the present year.

SEWERS AND DRAINS.

A large sum of money has been expended for the drainage of the city, much of which was of a temporary character merely.

Many of the sewers were constructed of plank, which in time decayed, and were replaced by cement tubes. The main sewer upon Elm Street was not laid deep enough, nor constructed large enough to drain the cellars upon Elm street, many of which in time of freshets have been flooded, to the great damage and inconvenience of their occupants.

During the past season, the laying of a new sewer of size and depth sufficient to remedy the defects in the old sewer, was commenced at Central street and completed as far as Merrimack street. I would recommend that its construction be continued the present year as far as Hanover street, and even farther, if the condition of our finances will allow. It is urgently demanded by the necessities of the people. It will probably never require to be relaid or repaired. A plan for the sewerage of the city was made in 1855 by a civil engineer competent for that purpose. Probably no better plan can be devised. It is of the highest importance that some system be adopted and adhered to, so that successive city governments may act in harmony upon this subject.

Most of the section of the city lying east of Union street and north of Hanover street is without any sewerage. It will deserve your serious attention to devise proper accommodation for that growing section of the city in this respect.

POLICE.

Our Police was never more efficient, or its affairs better managed. Very much depends upon the firm and prompt discharge of their duties, for the maintenance of good order, and for the prevention of crime.

Too many arrests were made in former years for petty offences. The fine and costs imposed were often paid when urgently needed for the support of the family of the prisoner, and which frequently suffered in consequence for the necessities of life. From the frequency of such arrests the city acquired a reputation for disorder which it did not deserve. These remarks do not of course apply to flagrant cases, nor frequent offenders, but to petty offences against

the laws. And I am happy to learn that the police have more recently brought fewer cases of this character before the Police Court.

My attention has been called to the matter of establishing a day police in addition to our night police force. It is urged that two officers would be sufficient for that purpose, and that they could also act as truant officers without additional expense to the city. I have not, however, sufficient information upon the subject to make any recommendation in regard to it.

My predecessor, in his annual message of last year, called attention to the condition of the lobby under the City Hall. Persons held in temporary confinement, for suspected crimes or offences, should have all reasonable accommodations afforded them. I have no hesitation in pronouncing the lobby totally unfit for the purpose of confinement of prisoners, and a disgrace to the city, and, unless it can be put into decent condition, should be permitted to be no longer used for such purposes.

COURT HOUSE.

The Court House, commenced in 1867, was completed in 1868, with the exception of the offices in the lower story for county officers, and has been occupied by the Courts since June last. A concrete walk has been laid down upon the three sides bordering upon streets, and the lot has been surrounded by a handsome and substantial iron fence. The building is an ornament and a credit to the city, and answers perfectly the purposes for which it is intended. There is not a house in this State, and probably not in this section of the land, that is more convenient in every respect, and better adapted for the holding of Courts. The committee who have had it in charge are deserving of great credit for the success that has attended their efforts.

A NEW COUNTY.

According to the natural course of things, the western towns in Rockingham county and northern and eastern towns in Hillsborough county will, at an early day, be constituted a new county. Whenever the matter is taken hold of by the business men of this

city, with their usual energy and activity, and *unitedly*, this desirable event will be accomplished,—even this present year. I suggest to you whether the advantages that would follow such an event should not induce us to strive for its accomplishment without further delay.

COMMONS.

Our Commons are an ornament to the city and a means of promoting the health of our citizens. They have generally been kept in clean condition and been properly cared for. Last year, concrete walks were laid across the upper portion of Concord Square, much to the improvement of its appearance and the convenience of people crossing it. The same improvement should be extended to the other Commons as fast as our finances will allow. I renew the recommendation of my predecessor, that a commencement be made of placing iron fences around our Commons as required by the terms of the deeds conveying the same to the city, and that the western border of Merrimack Square be so fenced this year.

CEMETERIES.

The Valley and Pine Grove Cemeteries are nearly or quite kept in repair from the proceeds of the sale of lots. Although they will not require of us any great outlay the coming year, yet we should see that they are not suffered to deteriorate in beauty or in other respects from lack of suitable care and attention.

MILITARY.

The *Military* of the city has recently been diminished in numbers by the disbanding of some of the companies. Those that remain are composed mainly of men who aided in suppressing the rebellion, and who are entitled to our gratitude and esteem. I am not aware that they make any claims upon us except for defraying

the expense of rent of armories, a reasonable sum for which purpose I have no doubt you will cheerfully appropriate.

CONCLUSION.

I have thus, fellow-citizens, endeavored to call your attention to some of the questions that will engage our attention. Other questions will probably arise that will call for our deliberation and action.

Let us, one and all, strive to discharge the duties we have just assumed, so as to promote the highest interests of the city,—and I assure you of my cordial co-operation with your efforts in that behalf.

When I consider that we are a city of nearly 30,000 souls, having a valuation of from ten to fifteen millions of property, with varied and, to some extent, conflicting interests, I cannot expect to meet the responsibilities imposed upon me without disappointing the expectations that some may entertain. But, relying with confidence for assistance upon your counsel and experience, I pledge you that whatever of ability or strength I may possess shall be devoted to the faithful discharge of the duties of the office I have accepted.

ISAAC W. SMITH.

JANUARY 5, 1869.

GOVERNMENT AND OFFICERS
OF THE
CITY OF MANCHESTER,
1869.

MAYOR,

ISAAC W. SMITH.

CITY CLERK,

JOSEPH E. BENNETT,

ALDERMEN,

WARD 1, Daniel H. Maxfield,	WARD 5, Daniel Connor.
WARD 2, Henry A. Farrington,	WARD 6, George H. Hubbard,

HENRY R. CHAMBERLIN, TREASURER.

Manchester, January 1, 1869.

FINANCE COMMITTEE'S REPORT.

The undersigned, Joint Standing Committee on Finance, certify that we have examined the foregoing account of Henry R. Chamberlin, City Treasurer, and find the same correctly cast and properly vouched.

During the year ending December 31, 1868, there has been received in the Treasury, including the balance January 1, 1868, the sum of three hundred three thousand eight hundred eighty-one dollars and eighty four cents, (\$303,881 84) and there has been paid from the Treasury during the same time, the sum of two hundred sixty one thousand eighty-six dollars and ninety nine cents, (261,086 99), leaving in the Treasury, January 1, 1869, forty two thousand seven hundred ninety- four dollars and eighty five cents, (42,794 85).

The sum of fifteen thousand nine hundred ninety-four and sixteen one hundredths dollars, (15,994 16) has been paid on account of the Court House, above what has been hired by temporary loan.

P. K. CHANDLER,
JAMES A. WESTON,
WILLIAM G. PERRY,

With the exception of the addition of two new reservoirs, one at Janesville, at the brook crossing near McCrillis' shop, and the other on the corner of Merrimack and Hall Sts, near the house of E. S. Peabody, the water supply remains essentially the same as reported last year.

There is still pressing need for the building of more Reservoirs in the North part of the City, above Bridge Street, and also, in the North-east part of the City, east of Union Street, and in the South-east part of the City, especially near the junction of Merrimack or Laurel and Maple Streets. There is absolutely no water supply South of Hanover and East of Pine Streets, and in no section of the City are the buildings more closely connected than in that locality, and should a fire occur there under unfavorable circumstances, the loss would be necessarily severe. The attention of former Administrations have been respectfully called to these sections, but, as yet nothing has been done to remedy the evil. I am satisfied that with little expense, that these sections could be made secure for all present needs, and would most respectfully urge upon your notice the necessity of early action in this matter.

The Department has been called out for duty during the past year nineteen times, viz:

Alarm January 14.

“ February 9.

Fire March 9, on Central Street. Loss \$1000 00

Alarm March 11, on Amherst Street.

Fire “ 20, on Elm Street. Loss 857 00

“ April 30, on Mechanic Street. Loss 100 00

Alarm May 17, cor. of Elm and Hanover Streets.

“ “ 29, on Beach Street.

“ “ 30, on Lowell Street.

Making a total loss in the City during the year 1868 of \$4,496.

No better evidence of the efficiency of the Department can be given than is contained in the above statement. To the promptness and vigilance of all its members, without distinction, I attribute our success for the year. Harmony and friendship has prevailed among them on all occasions. Their deportment at all times has been orderly. There has been no strife among them except that generous spirit of emulation, to see how each may best serve the public good.

I desire in conclusion, to return my sincere thanks to the members of the department for the kindness and courtesy shown me during the time I have been connected with it, and also for their prompt support when on duty. May the same spirit of good fellowship continue in the future.

Respectfully Submitted,

ISRAEL DOW,

Chief Engineer.

REPORT OF THE LIQUOR AGENT.

To the Hon. Board of Mayor and Aldermen:

The undersigned, City Liquor Agent, reports the following as the business, and the expenses of the Agency for 1868:

Cost of Liquors sold	.	.	\$575 58
Expenses	.	.	8 65
Corks, wrapping paper and envelops	.	.	2 67
Printing placards	.	.	75
Stamps and gauging by Assessor	.	.	1 29
Expenses of agent to Boston	.	.	3 65
Making and painting sign	.	.	14 50
Government tax	.	.	25 00

\$300 58		

E. M. KELLOGG,
City Liquor Agent.

REPORT OF OVERSEERS OF POOR.

*To the Mayor, Aldermen, and Common Council of the City of
Manchester.*

In compliance with the requirements of law, the Overseers of the Poor of said city, herewith present their annual report.

Whole number of Paupers assisted the past year, who had a settlement in the State, is eighty-nine, of which seventy-two have a settlement in this city, and seventeen have a settlement in other towns in the State. There have died of the above number during the past year, three;— two belonging to this city, and one from another town in the State.

The whole number of Paupers at the Almshouse during the past year is twenty, average number for the year, eleven and one half. There has been but one death at the Almshouse during the past year.

All of which is respectfully submitted.

JAMES A. WESTON, *Chairman*
SAMUEL S. MOULTON,
S. J. YOUNG,
M. E. GEORGE,
H. W. SAVORY,
JOHN FIELD.
JOHN C. SMITH,
TIMOTHY SULLIVAN,
NAHUM BALDWIN.

Overseers of the Poor,

REPORT OF THE COMMITTEE ON CEMETERIES.

*To his Honor the Mayor, and City Council, of the City of
Manchester.*

The Committee on Cemeteries ask leave to submit their annual report:—

The operations at the cemeteries in charge of your committee during the past year, have mainly been confined to the ordinary care of the grounds and fixtures. For this purpose about the customary amount of labor has been expended, Mr. Wm. C. Chase having been employed at the Valley, and Mr. K. Haseltine at the Pine Grove, with such temporary assistants as seemed to be required.

During the dry weather of last summer, a great necessity was felt at Pine Grove for a well, and Mr. Frank Preston was accordingly employed to sink one of his tubular wells, which has since supplied us unfailingly with most excellent water.

A structure containing a tool house and a shelter for persons and teams overtaken in the grounds by a shower of rain, should be built the coming season.

We transmit the report of our treasurer—

Respectfully submitted,

WM. G. PERRY,
JAMES A. WESTON,
S. N. BELL,
GEO. H. HUBBARD,
E. W. HARRINGTON,
J. H. BROOKS,
W. D. BUCK,
WATERMAN SMITH,
J. F. JAMES,
JOS. B. SAWYER,

Committee on the Valley.

TO THE COMMITTEE ON CEMETERIES.

The Treasurer of the Committee submits the following report:

THE VALLEY.

Cash on hand, Jan. 1, 1868,	.	\$48 54	
received for hay,	.	35 00	
“ for lots sold,	.	304 00	
“ for tomb rent,	.	57 00	
“ of W. C. Chase for work done			
by him for sundry owners of lots,	.	68 55	
received for interest,	.	16 52	
Balance overdrawn,	.	61 46	
		<hr/>	\$591 07

The payments for the year have been as follows: the bills being approved by Hon. J. A. Weston, who by vote of the sub-committee, has had charge of the grounds:

Neal & Holbrook, repairing bridge,	.	32 00	
Daniels & Co., hardware,	.	14 27	
James A. Weston, Clerk and Treasurer, 1867,		25 00	
Wiggins & Goodwin, ladder,	.	4 17	
Moses E. George, labor,	.	3 00	
Coleman Devine, “	.	7 50	
Henry Richards, “	.	66 62	
J. L. Taggart, “	.	3 00	
Wm. C. Chase, “	.	392 37	
“ “ money paid out,	.	27 13	
C. S. Fisher, whitewashing tomb, &c.,	.	11 00	
Hartshorn & Pike, repairs of fountain,	.	5 01	
		<hr/>	\$591 07

This certifies that I have examined the foregoing account of the Treasurer of the Committee on Cemeteries, and find the same correct and properly vouched for.

JOSEPH E. BENNETT,
City Auditor.

PINE GROVE.

The moneys of this cemetery are collected and paid over to the City Treasurer, and he pays them out on bills approved by your Treasurer, consequently the account will appear in the City Treasurer's report.

The receipts have been as follows:

For 45 lots sold,	.	\$478 65	
For interest,	.	1 60	
		<hr/>	\$480 25

Of this amount, there has been paid into the City Treasury \$325, and there remains in the hands of your Treasurer, \$155,25

Respectfully submitted,

JOSEPH B. SAWYER,

Treasurer.

MANCHESTER, Dec. 31, 1868.

We have examined the foregoing report of the Treasurer of the Committee on the Valley, and find the same correct, and supported by proper vouchers.

JAMES A. WESTON, *Committee.*

MANCHESTER, N. H., Jan. 2, 1869.

Jan. 4, 1869. In Board of Mayor and Aldermen. Read, accepted, and ordered to be printed.

Attest,

JOSEPH E. BENNETT,

City Clerk.

FIFTEENTH ANNUAL REPORT

OF THE

TRUSTEES OF THE CITY LIBRARY.

The Trustees of the City Library respectfully submit to the City Council their fifteenth Annual Report of the condition of the Library.

During the year past, no marked change in the mode of administering the affairs of the Library has been found necessary. The number of volumes added to its shelves has been equal to the average increase for a number of years, and they have been selected so far as the information at the command of the Trustees would allow, with reference to the supply of the immediate wants of the public, and with the design of making it as complete as practicable, in all departments of literature, as the means to be expended for such an object would admit.

The Number of persons making use of the facilities afforded by the Library has steadily increased, from the time of the commencement of its operations, and the advantages arising from its establishment, are more clearly developed with each succeeding year, and the necessity is daily made more manifest, that a more suitable and convenient location for the Library is required.

For several years past the Trustees have in their annual reports, called the attention of the City Council to the necessity, at an early day, of providing a building for the deposit of the Library, such, that it would insure its preservation from accidental loss.

At the commencement of the present year an appropriation, was made for the purpose of procuring plans and estimates, and for putting in the foundation, and soon after a committee was appointed by the City Council, to procure such plans and estimates as were required, and to submit them to the City Council. At a subsequent date, authority was given to the Committee to adopt such a plan as seemed to them expedient.

Owing to various circumstances not under the control of that Committee, but little progress was made. Various plans were presented and under the authority which had been given the Committee, they selected one which seemed to be best adapted to the requirements of the City, and which might be completed for an estimated expense of \$25,000.

Hope was entertained that such progress would be made, that the foundation for the building might have been laid before winter. Delays occurred in obtaining a satisfactory lot of land, which finally resulted in a postponement of the commencement of the construction of the building until another spring. The preliminary preparation being thus made, it will only require the necessary appropriation to enable the Committee to bring this matter to a successful completion during the ensuing year.

The Hon. Samuel D. Bell, who has been a member of the board since the Library went into operation, died in July last. By his decease the board have been deprived of the aid and of his knowledge and careful discrimination in the selection of books, and the Library has lost one of its earliest friends and firmest supporters.

The vacancy thus occasioned in the board was filled by the election of Waterman Smith, Esq.

The report of the Librarian shows that at the date of the last report the Library contained thirteen thousand ninety-seven volumes—that during the year there have been added five hundred and sixty—of this number four hundred and fifty seven have been purchased; one hundred and three have been presented, and sixty three volumes of Periodicals have been bound—making the whole number of volumes now in the Library thirteen thousand five hundred and fifty seven. Sixty Periodicals have been regularly taken and placed on the files.

The Library has been open for the delivery of books, two hundred and eighty days,—the total circulation, exclusive of books taken to be used at the Library Rooms, has been thirty five thousand and one hundred and thirty one. The largest number taken in any one month was in March.

The number of guarantees taken since the Library went into op-

eration has been six thousand one hundred ninety-five, of which four hundred and sixty-six have been added the past year.

The amount received for fines, on account of books detained beyond the time permitted by the regulations, has been nineteen dollars and twenty cents, which has been expended by the Librarian in payment of express charges, postage, stationery and other minor expenses, leaving in his hands, a balance of one dollar ninety-seven cents. Only fourteen volumes are unaccounted for and will undoubtedly be returned during the year.

The thanks of the city are due to those persons who have presented books to the Library and a list of such donations is herewith presented, and also a list of all books, periodicals and pamphlets received during the year, numbered in the order of their reception.

A Supplementary Alphabetical Catalogue of the additions made during the year is in process of preparation and will be published as soon as it is completed.

The Treasurer's report shows the expenditures for books and periodicals and a brief statement of the expenses incurred in the operations of the Library.

The incidental expenses which necessarily increase a little from year to year, have somewhat exceeded the original appropriation and the deficiency has been met by an appropriation for that purpose at the close of the year.

Unless an unusual expense should be required by reason of the erection of a Library Building, it is not anticipated that the expense for the next year will exceed, in any considerable degree, the amount expended during the current year.

In closing this report, the trustees desire to express their gratification with the manner in which their suggestions in reference to the wants of the Library have been met by the City Council, and we hope that the same spirit of liberality may continue, so that in a short time this city will possess the largest as well as the best selected Library in the State.

In Board of Trustees,—Read and Approved, Jan. 2, 1869.

JAMES A. WESTON, *Mayor and President Ex-Officio.*

JOSEPH E. BENNETT, *Clerk pro tem.*

LIBRARIAN'S REPORT.

Gentlemen of the Board of Trustees:

The following Report of the workings of the Library for the year 1868, and of its present condition, is respectfully submitted:

At the last report the number of volumes contained in the Library was thirteen thousand and ninety-seven. The increase during the year is five hundred and sixty-one, a decrease from last year of a little more than fifty, making the whole number at present, thirteen thousand six hundred and sixty-one volumes. Of the number added, four hundred and sixty-one were by purchase, including sixty-three volumes of periodicals, bound and placed on the shelves; the remainder are donations, of which a list is appended to this report. Sixty different periodicals are regularly received and filed. Of these there are thirteen weeklies, thirty-six monthlies, one semi-monthly, one bi-monthly and nine quarterlies.

The Library has been opened for delivery of books, two hundred and sixty days. The number loaned during this time, is thirty-five thousand, one hundred and thirty-one, an average per day of one hundred and thirty-five, seven less than the average last year. The number delivered in March is usually larger than in any one of the other months in the year. Of those not returned and unaccounted for, there are fourteen; these are not considered lost, and will, undoubtedly, yet be returned.

The whole number of guarantees taken since the Library was organized, is six thousand one hundred and ninety-five. Four hundred and sixty-six were received the past year, an average of forty per month. Eleven persons have deposited money, thereby entitling them to the use of the Library.

The amount of money on hand January 1, 1868, was sixty-one cents. Amount collected the past year on books detained beyond the time allowed, is nineteen dollars and twenty-five cents,—for

damage of books, fifty cents. Have paid express charges, postage, stationery and minor incidental expenses to the amount of seventeen dollars and twenty-eight cents, leaving a balance of three dollars and eight cents.

C. H. MARSHALL,

LIBRARIAN.

31st December, 1868.

TREASURER'S REPORT.

To the Board of Trustees of City Library.

The Treasurer of the Board makes the following Report of the receipts and expenditures by the Board, of the funds received by them on account of the City Library:

		<hr/>	\$2,297 69

Respectfully submitted,

S. N. BELL.

Treasurer of Trustees of City Library.

We have examined the above Report and find the same correctly cast and properly vouched.

WM. P. NEWELL,
JAMES A. WESTON.

Committee of Accounts of City Library.

I certify that I have examined the several items of receipts and expenditures embraced in the foregoing Report of the Trustees of the City Library, and find the same correctly cast and properly vouched.

JOSEPH E. BENNETT,
City Auditor.

Jan. 1, 1869. In Board of Mayor and Aldermen, Read, accepted and ordered to be printed.

Attest,

JOSEPH E. BENNETT,
City Clerk.

SCHOOL REPORT.

CITY OF MANCHESTER.

IN BOARD OF SCHOOL COMMITTEE, }
January 1, 1869. }

The Superintendent presented his Annual Report, which was read and accepted.

WILLIAM LITTLE, *Clerk.*

IN BOARD OF MAYOR AND ALDERMEN, }
January 1, 1869. }

The Annual Report of the Superintendent of Public Instruction, was read and accepted, and ordered to be printed.

J. E. BENNETT, *City Clerk.*

IN BOARD OF COMMON COUNCIL. }
January 1, 1869. }

In concurrence, the Annual Report of the Superintendent of Public Instruction was read, accepted, and ordered to be printed.

H. M. GILLIS, *Clerk.*

SCHOOL REPORT.

To the School Committee of the City of Manchester,

GENTLEMEN:

I submit to you my second annual report, of the Public Schools of this City.

The appropriation for schools in 1868 was the same as for 1867 viz: \$38, 000 00.

Many of the schools were discontinued at the close of the Winter term, yet the expenses were the same as for the previous year.

During the Winter term of the past year 69 teachers were employed, the greatest number ever employed at any one time in the City.

The number employed for the corresponding term of last year was 63.

The average number of Teachers for the year 1868 was nearly the same as for 1867 as several new schools were established during the year.

For the first half of 1867 the Middle and Primary School teachers were paid at the rate of \$300, per annum, for the last half at the rate of \$400.

The salaries were continued at the same rate for the year 1868.

Taking into account these facts, viz, that the salaries were not raised in 1867 till the middle of the year, and that so many teachers were employed the first term of 1868, the expenditures of the year are accounted for.

The Treasurer's Report which is here presented will show in detail the expenditures of the year:

SCHOOL DEPARTMENT IN ACCOUNT WITH H. R. CHAM-
BERLIN, TREASURER.

AMOUNT OF FUNDS.

Balance from old account,	.	.	\$54 61
Appropriation by city,	.	.	38,000 00
			<u>\$38,054 61</u>

H. R. CHAMBERLIN,
Treasurer.

MANCHESTER, Dec. 7, 1868.

SCHOOL YEAR.

The school year is now divided into three terms, the first term beginning the first Monday of December, and continuing 14 weeks, the second beginning the last Monday of March, and continuing 14 weeks, the third beginning the last Monday of August, and continuing 12 weeks.

The full term which is the last term of the year closes about the 20th of November.

The Winter term which commences the new year begins the first Monday of December.

Thus the expenses of the month of December are paid out of the next years appropriation.

The fiscal year in all the other departments of the City, closes with the calendar year and the expenses of each department,—excepting that of schools—from the first of January to the last of December are paid from the appropriation of the current year.

I see no reason for this arrangement with regard to the schools but on the contrary think the school year should close the last of December, and not allow bills to the amount of five or six thousand dollars to be paid the next year.

If this change is effected the fall term which has usually been 12 weeks in length will be extended four or five weeks, closing the last Friday of December.

The following list contains the names of those teachers who have served in the different schools of the city within the past year:

HIGH SCHOOL.

Principal—Wm. W. Colburn;

Assistant—C. Augusta Gile;

“ Mary E. Clough.

NORTH GRAMMAR SCHOOL.

Principal—Frank W. Parker, 2 terms;
 “ Jacob Eastman, 1 term;
 Assistant—Emma A. H. Brown;
 “ Betsey A. Ambrose;
 “ Martha B. Dinsmore.

SOUTH GRAMMAR SCHOOL.

Principal—Isaac L. Heath;
 Assistant—Lneretia E. Manahan;
 “ Rebecca B. Gove;
 “ Hannah A. Slade, 2 terms;
 “ Lottie R. Adams, 1 term.

PARK STREET GRAMMAR SCHOOL.

Principal—Thomas Corcoran;
 Assistant—Mary Scholastica, 1 term;
 Alice G. McQuoid, 2 terms.

EAST GRAMMAR SCHOOL.

Julia A. Baker;
 Mattie R. Kidder.

INTERMEDIATE SCHOOL.

Principal—Samuel W. Clark;*
 Assistant—Fannie M. Smith.

MIDDLE SCHOOLS.

No. 1, Sarah J. Green, 2 terms;
 “ Ellen B. Royell, 1 term;
 “ 2. Mary L. Sleeper;
 “ 3. Nancy S. Bunton;
 “ 4. Mary J. Fife;
 “ 5. Lottie R. Adams, two terms;

*School in session only two terms.

- No. C. Augusta Abbott, one term;
 “ 6. Nellie J. Sanderson;
 “ 7. Lizzie P. Gove;
 “ 8. Ellen B. Rowell, 2 terms;
 “ Laura A. Montgomery, one term;
 “ 9. Mary O'Brien;†
 “ 10. Annie M. Bernard, †;
 “ 11. Mary Vincent, †;
 “ 12. C. Augusta Abbott, 2 terms;
 “ Carrie E. Reed, 1 term;
 “ 13. Hattie L. Jones.

PRIMARY SCHOOLS.

- No. 1. Mary E. Ireland, 2 terms;
 “ Emma A. McCoy, 1 term;
 “ 2. Emily J. Parker;
 “ 3. Georgianna Dow;
 “ 4. Anstrice G. Flanders;
 “ 5. Addie L. Hutchinson;
 “ 6. Julia A. Clay;
 “ 7. Carrie E. Reed, 2 terms;
 “ Marianna Clough, 1 term;
 “ 8. Marianna Clough, 2 terms;
 “ Fannie M. Smith, 1 term;
 “ 9. Cleora E. Bailey, 1 term;
 “ Adelaide B. George, 2 terms;
 “ 10. Mary A. Richardson;
 “ 11. Helen M. Morrill;
 “ 12. Mintie C. Edgerly;
 “ 13. Abbie E. Abbott;
 “ 14. Emma A. McCoy;*
 “ 15. Mary Camillus, †;
 “ 16. Mary Liguori; †
 “ 17. Mary Louis; †
 “ 18. Sarah Clifford; †

- “ 19. Mary Xavier; †
- “ 20. Flora Campbell; †
- “ 21. Helen M. Hills;
- “ 22 Annie Murphy, †
- “ 23 Lucy Wheeler, †

WARD SEVEN.—GRAMMAR SCHOOL.

- Principal—Charles J. Darrah, 1 term.
- “ Annette McDoel, 2 terms.
- Assistant—Mary A. Parker, 2 “
- “ Lucia A. Cutler, 1 term.
- East Primary, Sarah D. Lord.
- West Primary, Antoinette Stevens, 1 term.
- “ “ Hattie A. Mack, 2 terms,
- South Primary, Laura J. Hamblett, 2 terms.
- “ “ Mattie S. Miller, 1 term.

WARD EIGHT.—GRAMMAR SCHOOL.

- Principal—Amos Wright. 1 term.
- “ L. H. Dutton, 2 terms.
- North Primary, Fannie E. Porter.
- South Primary, Rebecca Hall.

RURAL DISTRICT.

- No 1—Sarah A. Preston 1 term.
- “ 1—M. Theora Flanders, 2 terms.
- “ 3—Edward F. James, 1 term.
- “ 3—Katie L. Porter, 2 terms.
- “ 3—Martha W. Hubbard—Assistant 2 terms.
- “ 4—Wm. W. Patterson, 1 term.
- “ 4—Etta M. George 2 terms.
- “ 5—Eugene O. Locke, 1 term.
- “ 5—Mattie S. Miller, 1 term.
- “ —Ella M. Mitchell, 1 term.
- “ 6—George Little, 1 term.

- No. —Mary S. Reid, 2 terms.
 “ 7—Maria H. Hildreth, Principal.
 “ —Mary B. Lane, Assistant.
 “ 8—L. H. Dutton, 1 term.
 “ —Anna S. Osgood, 2 terms.
 “ 8—Henry T. Rand, 1 term.
 “ —Vilana S. George, 2 terms.

MUSIC TEACHERS.

Districts 2 and 10, I. S. Whitney.

No. 1, 3, 4, 5, 6, 7, 8, 9, and 11, J. D. Jones.

GRADUATES OF THE HIGH AND GRAMMAR SCHOOLS.

Since the year 1860, diplomas have been awarded to pupils who have completed the Course of Study at the High School.

As so many are unable to complete the course at the High School—in fact, as such a large number never enter this school—it has been thought best to award diplomas to all who shall pass a successful examination in the Grammar School studies.

Diplomas were awarded at the Grammar Schools at the close of the summer term.

The following is a list of the diploma scholars at the various schools:

NORTH GRAMMAR SCHOOL.

Annie H. Abbott,	Clara O. Lewis,
Ina E. Avery.	Lizzie H. McCrillis,
Mary F. Blunt,	Abbie E. Moore,
Emma A. Blood,	Flora M. Proctor,
Emma F. Boody,	Emma B. Quimby,
J. Emma Boutelle,	Hattie Shannon,

* School only 2 terms.

† School only 1 term,

Etta A. Frost.
 Clara A. Glidden,
 Nettie Haynes,
 Minnie F. Hoyt,
 Lilla H. Jackson,

Mary S. Spofford,
 Emma F. Stowell,
 Martha E. Sutcliff,
 Elvira Watson

George I. Aldrich,
 Robert A. Annan,
 Malcolm L. Bradley,
 James A. Buncher,
 Wm. H. Cate,
 Arthur E. Clark,
 Henry C. Cross,

L. W. Downs,
 Henry M. French,
 Walter Newell,
 Bayard T. Perry,
 Edward E. Smith,
 Edward B. Woodbury.

SOUTH GRAMMAR SCHOOL.

Annie F. Baker,
 Josie A. Boshier,
 Mary F. Dana,
 Ida F. Drew,
 Nettie J. Palmer,
 Nellie M. Plummer,

Josie S. Rumrill,
 Minnie F. Sanborn,
 Nellie F. Smith,
 Ella M. Straw,
 Rocilla M. Tuson.

George C. Campbell,
 Charles C. Cochran,
 Frank Cutchins,
 Perry H. Dow,
 Leroy A. Hart,
 Eddie S. Heath,

Charles A. Parker,
 Fred. C. Sanborn,
 Arthur E. Stearns,
 George M. True,
 Henry G. Wood.

PARK STREET GRAMMAR SCHOOL.

Walter J. Coreoran.

At the close of the Fall Term, diplomas were awarded to 14 pupils at the High School, viz:

FULL COURSE.

Addie M. Chase,
 Marietta Howe.

John M. Knowles.

ENGLISH AND FRENCH.

Emma A. Cross,
Ida J. Knowles,

Annie M. Varney,
Emma S. Varney.

ENGLISH.

Jennie S. Baker,
Addie C. Marshall,
Alma Porter,

Joseph H. Batchelder,
George E. Hall,
Wm. A. Perry,
George A. Stokes.

ATTENDANCE AT THE SCHOOLS.

A great effort has been made in many of the schools, to secure a more regular attendance.

Irregularity of attendance is a serious evil in many of our schools and constant effort should be made to correct it.

Absence, tardiness, and dismissal are in too many instances unnecessary, and parents should cheerfully co-operate with teachers to lessen them.

It has been altogether too common a practice to allow children to remain away from school to witness some event which could be of no benefit to them, while at the same time they were losing their recitations.

Nothing need be said of the loss to any pupil which is occasioned by absence from recitation; a loss not only to the scholar thus absent, but also to the class of which he is a member, as the class must either wait till the delinquent one has gone over the lost ground, or the absentee loses much that is necessary for him to know before taking up new subjects.

A man crawling through Elm st. or walking a tight rope; a company of soldiers headed by a fife and drum; a horse race or a circus, and many other similar occurrences, are regarded by many parents as of more importance than the education of their chil-

dren, and as a consequence their children are allowed to remain away from school whenever one of these sights is to be witnessed.

At the close of the term if one of these pupils who has been absent from school, to witness such exercises, is not the best scholar in the class, parents have the charity to attribute it all to the negligence or partiality of the teacher.

Let parents send their children to school regularly, even if there are some exhibitions upon the street which children fail to witness, and then there will not be so much complaint with regard to the poor success of pupils; let less time be taken to prepare for a party and more time for the preparation of a lesson in Geometry or Algebra, less time to frequent the many places of amusement, and more time to study the common branches, and then there will be a higher percentage of attendance at the schools, and less cause for complaint with regard to the backwardness of pupils.

In this connection it may not be amiss to speak of measures adopted in some of the schools to secure what might be considered a high percentage of attendance but which really is not so.

In some instances so much importance is attached to tardiness, that pupils who are a few minutes late prefer to return home and be absent rather than tardy.

Another evil practice in the schools is to allow pupils to be present at roll call, and then be absent the remainder of the session, and yet be marked as present.

By what process of mathematical calculation such scholars can be marked as present, I have not been able to learn, and should be pleased to be informed with regard to the operation.

Another and the worst practice of all is this; If a scholar is absent five consecutive days he is not regarded as a member of the school during the five or more absent days,—although this is in direct violation of the school regulations,—as *ten* and not five is the number of days specified.

It has sometimes happened that when scholars have been absent three or four days, they have been sent home to remain the rest of the week, that the percentage of attendance might not be low.

All of these practices should be discontinued and *attendance* should be regarded as of more importance than being present at

roll call, and the main object should be to see how many *whole* days pupils can be present rather than to see what high percentage can be shown in a report.

All live teachers, knowing as they do the evil of absence as well as of tardiness, will make such exertions as will secure a regular attendance, and parents, knowing the annoyance to which teachers are subjected on account of these hindrances, should cheerfully assist in the matter.

Punctuality is a habit which should be carefully cultivated in our schools yet we must not forget that there are circumstances at times which will prevent scholars from attending regularly.

Encourage all pupils to attend whenever they can, and let the habit be acquired in the lowest grade.

Several scholars have not been absent or tardy once during the past year, others have not during one term.

It was intended to publish a list of their names in this report, and the teachers of the city were so informed, but as it has been impossible to obtain a correct list from all of the schools, it is not deemed advisable to publish any at this time.

Several teachers have kept no record of tardiness, while in other schools records have been so kept, that an accurate report could not be made.

This is to be regretted; and I hope that for the coming year this subject will receive attention, so that the names of all not absent or tardy for a year or for a term, may be published, constituting a Roll of Honor.

In the last report, I stated that our higher grade schools were considerably smaller than the others, from the fact that so many pupils leave school at an earlier age.

I have alluded to the same subject in this report, as I consider it a matter of great importance, and possibly something may be done whereby parents can be induced to send their children to school for a longer time.

In too many instances the reasons are imaginary, which induce parents to withdraw their children from school at so early an age.

By a little extra effort many children could be kept at school a few years longer.

I have made careful inquiry with regard to the attendance, and have ascertained from the reports of teachers the number of pupils of different ages, and am now able to give the correct figures.

In the month of January, 1868, there were 3100 pupils attending the different schools at one time. Of this number, 2,350, more than three-fourths of all the children in the schools of this city were under thirteen years of age.

In this city there are nearly 5000 children between the ages of 5 and 18, while but 15 annually graduate at the High School.

There may be no remedy for this in a city like ours, but it seems that more ought to complete the Grammar School course, even if they never enter the High School.

COURSE OF STUDY—GRADE OF SCHOOLS.

The course of study has been revised, and although at present it may not be precisely what we need for the schools, it is working well, and the schools are accomplishing much more than they would without the prescribed course.

Changes should be made from time to time as they are needed.

One of the principal changes has been to introduce the study of Grammar and Arithmetic into the High School.

It was found that there was not sufficient time allotted to these branches in the Grammar School; more particularly was this true with regard to Grammar.

Accordingly scholars entering the High School have been obliged to leave the study of English Grammar before they were sufficiently familiar with it.

Geography has been taken out of the Primary Schools, thus giving the Primary teachers more time to attend to reading and spelling, branches which have been too much neglected, not because they could not be successfully taught, but because so much time was required for other branches of less importance, especially to younger children.

It is hoped that more time will be devoted to reading and spelling in the Primary and Middle schools, and if there is not time to attend to these branches sufficiently as the course is at present ar-

ranged, let more time be allotted; in fact let it be understood that scholars should learn to read and spell before attempting to pronounce the names of rivers and mountains in Asia and Africa, or before attempting to learn the meaning of terms used in Written Arithmetic, or the rules for Analysis and Parsing.

Heretofore Penmanship has been taught in no grade below the Grammar School, and as a consequence many have left our schools without ever having written a Capital letter.

Penmanship is now taught in the higher Middle Schools, and I trust that soon this branch will be introduced into all Middle Schools, and it may be deemed advisable to have it taught even in lower grades.

More time is now allowed for history, but these topics will be considered in another part of the report.

We have in this city at the present time, four distinct grades of schools, viz: High, Grammar, Middle and Primary.

The Intermediate School is not regarded as one in the regular grade, but is designed to afford special advantages to those pupils who cannot pursue a regular course in the High or Grammar Schools.

The Middle and Primary grades are each divided into 1st and 2d, making four grades below the Grammar School.

There are three classes in the 2d Primary Schools; the time allowed for pupils in this grade is one year and a half; in the 1st Primary the same number of classes, and the same length of time, making three years in the Primary grade.

There are two classes in each Middle School; one year in each school, making two years in the Middle grade.

The Grammar School course is four years, one year for each division with two classes in each division, making eight classes in a Grammar School.

In the High School there is a Classical course of four years and an English course of three years.

Thus the time contemplated for a pupil entering the lowest Primary and continuing his studies through the Classical course at the High School, is thirteen years.

If scholars apply themselves, the course can be complete in less

time, while if they are negligent they will drop back into other classes and not complete the course in the prescribed time.

It has been the endeavor to arrange the studies so as to render the course most convenient for the mass of pupils. We cannot afford to waste time. In too many instances courses of instruction are arranged for the rich, rather than the poor.

The object of our common schools is to provide means of education for every child in the community, and schools can be so conducted that children who are unable to pursue their studies long enough to obtain a liberal education should have the privilege of attending to those branches which will be most useful to them in the every day walks of life.

Many things would be beneficial, but there is not time to attend to them and the labor necessary to be bestowed upon them will not compensate for the time taken from other branches.

There should be no unnecessary detention in attempting to have a child master what will not benefit him.

In making these suggestions I would not be understood as joining with those who are continually asking that nothing but the *so-called practical* studies should be pursued in our schools, for there is no study—in my opinion—laid down in the course, which is not practical but as so many cannot complete the full course, there are some branches that can better be omitted than others.

After a careful consideration of the subject, having examined the courses of instruction and noticed the working of the different grades in many places, we are convinced that it is better for our schools to have two divisions of each of our lower grades, and I trust that before long there may be three divisions of Primary Schools.

By multiplying grades the number of classes in each room will decrease; hence teachers will have more time to devote to each class and more attention can be given to each particular subject.

I think this point is sufficiently clear to all who have examined the subject, and further comment is unnecessary.

It will take sometime to bring our schools to the exact standard laid down for them, but they are gradually approaching it.

In many localities the Middle and Primary schools are classed

according to the grade recently adopted, while in other localities there are not enough scholars to allow this classification.

In the Merrimaek St. building, Franklin St. building and Spring St. building, this classification already exists, there being a 1st, and 2d Middle, and a 1st, and 2d Primary at each of the above named places. In the Intermediate building, Primary School No. 10, ranks as 1st Primary, and No. 9 as 2d.

In the Old High School building Primary No. 2 ranks as 2d Primary, and Primary No. 3, which has just been transferred from Bridge St., is the higher school of this grade, and in the same building the school formerly known as Primary School No. 1 is now classed as a 2d Middle School.

I hope that before the close of another year the Primary School at Towlesville together with the one in the old house on Concord St. will both be in a new building, and classified like the other Primary schools.

A building can be erected sufficiently large to accommodate both of these schools and the Middle Schools, thus leaving the Blodgett St. and the Wilson Hill schools the only ones in the central part of the city which will not be graded and classified according to the plan adopted one year ago.

CHANGES IN SCHOOLS.

At the commencement of last winter term two divisions of a Grammar School were opened in the High School Building; at the commencement of the fall term another division was placed in the same building.

Another grammar school division is needed in that locality to accommodate pupils of that grade.

There are pupils enough in that vicinity for a full grammar school, and as soon as the rooms are provided such a school should be established.

The Middle School, which for many years had been kept in the old house on Bridge St., was transferred to the Blodgett St. house last May, and the Primary School has just been transferred from the same building to the Old High School building on Lowell St.

Several Middle and Primary schools were discontinued at the

beginning of the spring term. At the beginning of the fall term Primary School No. 14, on Lowell St., was discontinued. During the fall term there was no school at the Intermediate.

The crowded condition of the schools at Amoskeag rendered it necessary to open another school in that ward at the beginning of last spring term.

The old school building has been used for that purpose for the past two terms.

The house at Bakersville has been divided into two rooms, and two teachers are now permanently employed in that district.

STUDIES PURSUED.

Last year many of the studies were noticed separately and considerable space devoted to the consideration of each.

I have already stated that Penmanship will hereafter be taught in the Middle Schools. Great improvement has been made in this branch within the past year, and this subject is now receiving the attention it deserves.

It is hoped that Grammar School teachers will continue to manifest that interest in this department which has been shown during the past year, and also that in those schools into which it is to be introduced there will be an equal degree of interest.

There is an objection to the method now in operation, viz: that too much time will be expended upon principles and elements, and not enough copy-books written in the course of the year. Let time enough be devoted to principles, but let more copy-books be used in the course of a year. I trust there will be no ground for this complaint during the coming year.

With regard to spelling it was stated in the last report "That a thorough examination of the classes in the High and Grammar Schools would convince any one of the necessity of a more rigid drill in this branch." The deficiency in this respect is greater than I supposed at that time, and a careful examination of this subject shows that this study has been too much neglected. More atten-

tion is now given to it, and there is reason to believe that pupils will go from the lower grades better prepared in this branch—but judging from the past there is no danger that this study will become a “hobby” of many teachers.

Geography has received during the past year its due share of attention and possibly more. I do not at all undervalue the importance of this study, for I desire to have no pupil leave school without a good knowledge of this subject; yet in this age of *hobbies* there is danger that teachers in their zeal for any branch—especially one which has been so poorly taught, in many instances as this has—should be induced to slight some branches in order to have classes appear well in a study formerly considered of no account.

Teachers are discontinuing the practice of requiring pupils to commit to memory the names of rivers, and islands in some far off country, names which they may never again have occasion to hear and which are pronounced only with difficulty, and instead of this, scholars are learning something of their own state and country and are taught that ideas are of more worth than words.

It is deemed advisable to teach children something of the position and production of New Hampshire—and Hillsboro County in particular—even if they are obliged to leave unlearned the names of some of the places of half civilized countries in Asia, and Africa, or if they are unable to tell the direction and length of the Murrumbidgee River.

Map drawing is now successfully taught in the schools and good results have been obtained in this department during the past year.

I think as our course of study is arranged, too much time is allowed for geography, and that we can have more geography taught in less time.

Guyot's Intermediate Geography, which has been in use for the past year, has proved a good work, and teachers have obtained good results by using this method.

As regards history, we need a primary work on this subject to be used in the lower division of the Grammar Schools. This branch requires more attention than it has received in former years, it has been neglected, on the ground that pupils could read works of

history at home or after leaving school, but I think it deserves a permanent place in the list of school studies.

Many pupils will not have the time or the means to attend to reading works of history out of school, and others will not have that interest in the study which comes from a course of instruction while using the text-book.

There are many explanations needed and also many suggestions to be made which will interest the pupils, and a love for the study will in this way be acquired; the pupils will lay a good foundation and be induced to add to the knowledge which is acquired while pursuing the study in the schools.

Written Arithmetic has always been well taught in our schools and at the present time the results here are as good as formerly. The only complaint that has existed in former years has been that there were too many formulas, too many difficult rules to be committed to memory, but the grounds for these complaints, I think, no longer exist.

It has sometimes been thought a good exercise to require children to write numbers expressing decillions, undecillions, &c., but as they find but very few examples in the Arithmetics; involving such numbers, it seems to be more profitable to spend the time in adding and subtracting numbers which can be expressed with by far less figures. In Mental Arithmetic formulas are not as much used as formerly, and the results are better.

In schools where long, wordy explanations of the examples are not required where pupils are not compelled to commit to memory a long list of words whose meaning to them is quite obscure, in schools where so many unintelligible terms are not used, but where pupils instead of being compelled to fix their minds upon the wording of the examples, are taught to concentrate their energies upon arithmetical calculations there are the best results.

Mental Arithmetic is now taught with good success in most of our lower grade schools, and in many of them mathematical calculations are performed with an accuracy creditable to older pupils.

Walton's Tables have been of great service in many schools and the benefit of this kind of drill is readily seen in many classes.

The Rules in Arithmetic should be clearly understood and the examples should be solved in a manner to be understood by all, but let the explanations be concise and the pupil's memory not burdened with terms to such an extent as to lose sight of the object for which he is striving.

I think our teachers could succeed better with mental arithmetic if they could use a different text-book, but it is better to keep a poor book in the schools than to run the risk of a change.

I trust the same good results that have been obtained in the study of arithmetic during the past may still be noticed in the future.

English Grammar is now taught in the High School and in the higher divisions of the Grammar School. There is more interest manifested in this study than formerly, and it is to be hoped that this interest will not abate.

Scholars should be taught to express their thoughts in writing as soon as they are able to write, and thus grammar can be studied long before the text-book is used without obliging the child to commit to memory the rules of syntax.

A course of instruction in music has been adopted for the different grades of schools, and the result in this department will compare favorably with the others, showing the benefit of system in this branch as well as in the others.

It is a question to be considered whether or not drawing shall be taught in any of our schools. It is advocated by many, and in cities where it is taught it works well.

A smaller text-book on Physiology, I think, would be desirable, as there is not time to complete the one now in use, and it is difficult to decide what portions of it to omit.

EXAMINATIONS, PROMOTIONS, EXHIBITIONS.

During the past year there have been no stated times set apart for so-called examinations; no occasion for exhibiting certain classes which had been drilled for weeks upon some particular subjects.

I have examined the different classes at the various schools, a

number of times, but it has been done without any previous arrangement with the teachers as to the time or method.

At the close of the summer term, a time was set apart for each school to receive visitors, and in most of the schools there was nothing but the regular exercises.

No special preparation was made for these visitations; the schools were seen at their every day work.

These days were set apart because we desired to have our schools visited more, and many parents would not make these visits unless such times were appointed.

This should be different; parents should be induced to visit schools during term time and witness the regular exercises.

So few visits are made to some schools, that the pupils cannot do themselves justice when visitors are present. I stated in the last report that all citizens should understand that the schools were at all times open to the public, and I emphatically repeat it at this time, and urge upon all the importance of visiting schools at any time without any previous notice.

Let it be an every day occurrence, and the scholars becoming accustomed to it, will feel composed and will do much better than if they are seen only on special days.

The complaint is made that when schools are visited teachers suspend the regular order of exercises, and in many instances no recitations are heard, but instead of these there are some general exercises which I think are altogether too general.

Each school is supposed to have a regular order of exercises, and this order should be adhered to unless there is some good reason to depart from it.

If persons desire to visit a school to hear a particular recitation, they will ascertain at what hour that recitation occurs and govern themselves accordingly.

If teachers have a particular class which they keep for exhibition, a certain time should be allowed for this class, and the time stated upon the programme of exercises for the school.

If a committee man wishes to hear any particular class, he will state the fact to the teacher, and if he does not make any such re-

quest the fair inference is that he wishes to witness the regular programme.

People from other places will often visit our schools and will be anxious to hear a recitation in some particular department, and the same may be true with regard to our own citizens. In such cases teachers should accommodate their visitors, but as a general thing visitors will be better pleased to hear the regular recitations, and if a class is reciting at the time persons enter a school room the recitation should proceed as soon as possible without any apology or excuse on the part of a teacher. Scholars must not expect that every time there are visitors in school something extraordinary will occur.

Members of the School Committee and all others upon inquiry at the Superintendent's office can ascertain at what hour any lesson will be heard, as the programme of exercises for each school should be there in accordance with the following regulation adopted by the School Committee, viz: "Teachers shall send to the Superintendent as early as the second Monday of each term the order of exercises in their respective schools." Another regulation states that "The Superintendent shall receive and classify at the beginning of each term the order of exercises of each school in the city." I dwell at some length upon this point, because objections are often urged against visiting schools at other times than the regular appointed days. It should not at all interfere with the exercises, and teachers and scholars should be taught to believe this.

Several times during the past year there have been written examinations in the higher divisions of the Grammar Schools. It is intended to continue them in the High and Grammar Schools the coming year.

At the close of the summer term the candidates for the High School were examined in the various branches studied in the Grammar Schools.

The examination was in writing, continuing through the whole of one day.

Between sixty and seventy were examined; about fifty were admitted upon the first examination, while others were allowed a second trial.

It being the first year that scholars had been examined in this manner, the examination was not so thorough and rigid as I hope it may be in the future. Now teachers and pupils expect it and a high percentage of correct answers should be required.

Some were admitted who should have remained at the Grammar Schools, but I hope this will be no precedent for another year. If we admitted pupils to the High School last year who were not fully qualified, let it be no reason for admitting others next summer unless they come fairly up to the requirements.

A great many of the candidates, however, showed themselves familiar with the different studies, many of them answering correctly upwards of 95 per cent. of the questions proposed at the written examination. In addition to this there had been several such examinations during the summer term, and from all these circumstances I felt assured that the class would compare favorably with any class that ever entered the Manchester High School. It is a class that is able to perform a great amount of labor, and it is hoped that the High School teachers will see to it that they are busily engaged during their connection with the school.

Regular promotions were made in most of the other schools at the close of the summer term.

Classes have been promoted at different times in the year whenever they were found qualified, and sometimes changes have been made to equalize the number of pupils at the different schools.

I would renew the suggestion made last year, that regular promotions be made twice a year.

In February last about forty candidates for teachers were examined.

It was stated last year that the last week of the summer term might be devoted to exhibitions of the different schools, with the understanding that they were not to be regarded as examinations, but such exercises would be had as teachers might think best. Several of the schools had these exhibitions, and I am sure the preparation for them did not interfere with the regular exercises of the term. For instance, the exercises at the South Grammar School exhibition would have been creditable to any school, and

were considered superior to anything of the kind witnessed here for years; yet the first class in this school—those who mainly participated in the exercises—at the examination for admission to the High School proved themselves familiar with all the studies which they had pursued, and their thoroughness in the various branches showed that nothing had been neglected in order to gain time to prepare for the exhibition.

While exhibitions can be conducted in this manner; while the preparation for them does not occupy the time which should be devoted to the regular studies there can be no objection to them.

EVENING SCHOOLS.

Last September an appropriation was made for evening schools: An evening school was taught at Amoskeag during the fall term by Mr. Dutton, Master of the Grammar School in that ward. Another one was opened in the Intermediate building and for a number of weeks instruction was given by some of our public school teachers. About one hundred and fifty persons attended the school in the Intermediate building.

At present one division of the school is in the Old High School building under the charge of Mr. Ferd. Gagnon; the other is in the City Hall building under the charge of Mr. E. D. Hadley, assisted by Miss J. C. Walker. No doubt can be entertained of the need of these schools and a larger appropriation will be needed to sustain more of them.

TRUANCY.

Attention was called to this evil in the last report and the subject has been laid before the City Council, who alone have the power to appoint Truant Officers, but no definite action has yet been taken with regard to it. I hope the School Board will lay this matter before the Council again and show the importance of an efficient truant law.

We have in this city a great many boys who should attend

school, but they are wasting their time in the streets and saloons and the law should reach them and compel them to attend school.

SCHOOL BUILDINGS.

Some of the buildings have been repaired during the past year while others remain in the same condition as formerly.

The Park St. House has been thoroughly repaired and furnished with new and comfortable seats and desks and the building is now in good condition.

The lower rooms in the Spring St. House have been refurnished and are now comfortable, the rooms are better lighted than formerly and are more convenient in many respects.

The rooms in the North Grammar school need new furniture in order to have them correspond with the rooms on the lower floor.

Two rooms in the lower part of the Franklin St. building, two in the Intermediate building, one at Wilson Hill, two in the Old High school building and one at Amoskeag, have been furnished with new seats and desks during the past year.

The furniture in several other rooms will need to be changed during the coming year; it will add to the beauty of the rooms and will render some rooms comfortable for the children which rooms are now very uncomfortable indeed.

The old house at Goff's Falls has been repaired as much as it could endure in its dilapidated condition. The members of the City Government next year will undoubtedly see the necessity of providing a more suitable building in this district.

The house at Bakersville has been arranged for two schools and now well accommodates the scholars in that vicinity.

In Piscataquog more school room is needed, as the schools in the upper house are always crowded, notwithstanding so many pupils are sent to the Franklin St. schools; in Amoskeag another building is needed to provide accommodations for the school now taught in the old building.

The house at Hallsville is not large enough and is not conveniently arranged for the number of pupils who attend; the house at

Massabesic, needs to be enlarged and improved in many respects; some slight repairs will be needed upon the house in District No. 9; new furniture should be placed in the house at No. 6, while in District No. 1, the house has been repaired as many times as is practicable.

The northeastern portion of District No. 2, is not very well furnished with school buildings.

The old house on Bridge St. is now unoccupied, primary children in that section being obliged to attend school on Blodgett St., Concord St. or in the Old High School building. The house at Towlesville, is not suitable for a school, while the old houses on Concord St., have for years been regarded as unfit for that purpose.

Thus it will readily be seen that in that section of the city, scholars belonging to Middle and Primary Schools are not provided with suitable school rooms. If any arrangement can be made so that these schools can all be placed in one building somewhere on Bridge St., near Ash or Maple, it will accommodate that whole section. A building for two Primary and two Middle schools would accommodate all the scholars of those grades in that part of the city, or if preferable two smaller buildings can be erected.

I have already stated that room is needed in that section to accommodate a Grammar School and it is hoped the Primary, Middle and Grammar Schools will all be provided for the coming year.

A new steam heating apparatus has been placed in the High School building. It has not been in use long enough for us to know what success may attend it, but from present appearances it bids fair to excel other methods of heating school buildings. The apparatus was furnished by Mr. J. Q. A. Sargent of this city.

There are two eight feet boilers, thirty-six inches in diameter one in each section of the basement. They are so arranged that in the fall and spring when not much fire is needed, one boiler only is used; in the winter time or whenever it becomes necessary both can be used. Both boilers are substantially inclosed in brick, and the whole, including the array of pipes, is surrounded with a wire enclosure. This heating apparatus is designed for low pressure, being constructed so as to develop the largest quantity

of heat with the smallest quantity of fuel. The whole building is heated by indirect radiation, the pipes are laid in coils in the basement, and the hot air from the coils filled with steam from the boilers, passes into the several rooms through flues. In the rooms nothing is seen of the apparatus but the registers which open into the several apartments. By this method no space is occupied by pipes in the different rooms, each room thereby presenting a much better appearance.

The boilers are fitted with improved steam and water gauges, and gauge cocks and safety valves, rendering it impossible for any accident to occur. They are self regulating and are both supplied with one pump, and are so arranged as to require but a small quantity of water, as the condensation returns immediately to the boiler. There are in the basement fourteen coils, corresponding to the same number of registers. The registers open into the main rooms, the recitation rooms, the rooms containing the chemical and philosophical apparatus, and the entries, so that the whole building is thoroughly warmed. The whole amount of pipe used is thirty-eight hundred feet. The simplicity of the arrangement is such that any person can manage it.

If this method proves as successful as we anticipate, other buildings should immediately be heated in the same manner, especially the Spring St. building, which has never been heated properly. The health of pupils in the North Grammar School is too much exposed, and too much sickness is caused annually to allow the present arrangement for heating and ventilation to continue.

The names of the different buildings are given and also the number of pupils that can be accommodated at each.

NORMAL SCHOOL AND TEACHERS' INSTITUTES.

The question of a Normal School has been agitated considerably in this State within the past few years, but as yet the Legislature has done nothing towards establishing one. The subject is still under discussion, and will be brought before the Legislature at its next session.

In many cities, Training schools have been established, which have been quite succesful. Reference was made to this subject last year and the suggestion made that a Normal Department might be established in this city in connection with the High School. I think the suggestion was a practical one, and the subject of a Training school in this city is one that needs the consideration of the Board.

At the last session of the Legislature an appropriation was made for Teachers' Institutes.

The State Superintendent has held Institutes in several of the counties and will hold one in Hillsboro County some time in the spring. In whatever part of the county it may be held I hope the

Board will do all that it can to assist the movement, and that Manchester teachers will manifest such an interest as will reflect credit upon the educational system of this city.

The schools have been suspended a number of times within the past year for the purpose of allowing teachers to attend Teachers' Associations. Objections are urged against this practice, but I think much is gained by these meetings and that our schools are made better by them.

Live teachers will improve every opportunity of acquiring new methods of teaching and of improving on the old ones; and frequent interchange of views between teachers of different sections will create an interest and zeal in the labor and the beneficial effect of such gatherings will be felt upon the schools. No teacher can say that he can learn nothing from others or that he can teach well enough already.

The teacher that can teach so well that no improvement can be made, has taught long enough and should give place to one of a progressive spirit, one who is determined to keep abreast of the times. Some Yankee has said that "A man is not as good as his father unless he is better," and so a teacher who is not ahead of former times is lagging and has not caught the spirit of the age.

In December last, many teachers of this city attended the State Association at Concord.

In January the Hillsboro County Association, was organized in this city; lectures were given by Mr. Walton upon Arithmetic, Mr. Bowler on Penmanship and Mrs. Smith on Geography.

The exercises were interesting and profitable, and our teachers derived much benefit from them.

A meeting of the Association was held in Bedford, last May, which was attended by most of the teachers from this city.

Meeting have frequently been held at the Committee Room during the year which meetings have been well attended by the teachers.

The various branches taught in the schools have been discussed at these meetings, questions of interest to all teachers have been considered and the exercises generally have shown that the teachers of this city are enthusiastic in their labors.

"I would recommend that during the coming year the Board obtain the services of competent instructors in the various departments and that our teachers have the opportunity of attending lectures occasionally upon the several branches. It will be the means of creating an interest and an enthusiasm in our schools.

CONDITION OF THE SCHOOLS.

My report was nearly written before I was aware that the sub-committees would not report the different schools in detail. Hence I cannot speak of them as fully as I should, as the report would be too much extended. I shall speak of them by classes.

HIGH SCHOOL.

We have in this school competent and experienced instructors, and the members of the school possess ability sufficient to render it a superior school. Yet our High School has never maintained that high rank which its importance demands, and too often our citizens have spoken disparagingly of this school, and pointed to the Grammar and lower grade schools with feelings of pride. The real difficulty, it seems, has been a want of interest; while there has been nothing which has deserved special criticism, there has not been that enterprise in the school which calls for special praise; it has lacked *positiveness, vitality*. In the language of a former report "In this school there should be no mediocrity, no such standard as that of respectable scholarship or ordinary deportment. Pre-eminence, and that only, should be the characteristic of the school"

Several reasons beyond the control of teachers have operated against this school in the past. Pupils have been admitted to the school who were not thoroughly qualified and after admission have been allowed to be absent much of the time and still retain their connection with their class and receive diplomas at the end of the course the same as those who have labored faithfully all the time.

Graduating from our High School has not meant what it should in a city where there are so many who might make excellent scholars.

Let more caution be exercised with regard to admitting pupils and after they are admitted let them pursue the course marked out, and if it is necessary that they should lose much time while members of the school, let them drop back into other classes and not claim the same privilege as those who came fairly up to the requirement.

These matters are entirely under the control of the Board; we have all been to blame in this matter, and now we should one and all endeavor to set the matter right, and when the Committee and Superintendent have done their duty, then let teachers infuse that spirit of enthusiasm into the school which it has lacked, and the lack of which has been the cause of such criticisms in the past.

Such a course as this will make our High School what it should be, and the graduates of the institution will take some pride in it, and more parents will then desire that their children should enjoy its privileges.

The more rigid the discipline at the High School, the more that is required of pupils in that school, the more eagerly will pupils in the Grammar Schools strive, and the more anxious will Grammar School teachers be to send to the High School those well qualified.

And Grammar School teachers will demand—if they must send to the High School such pupils—that scholars from the lower grades shall be better prepared, and the result of making the High School more efficient will be to increase the efficiency of every grade in the city. We *can* raise the standard of the High School and it should be done.

INTERMEDIATE SCHOOL.

This school was not in session during the fall term owing to the limited number of scholars. It was not an efficient school during the spring term. During the winter term it was in better condition. It is now opened again and cannot but be successful under

the present principal. The principal of the Intermediate school has as much salary as the principal of any Grammar School in this city, and I trust that the Board will consider the object for which this school was established, and not undertake to deprive so many pupils of the benefit of an English education.

GRAMMAR SCHOOLS.

A new principal was elected to the North Grammar School at the beginning of the fall term. He had had considerable experience in teaching, and his examination showed that he was thorough in the branches required to be taught. He has not yet been in charge of the school long enough for us to speak of the results of his labors, and we must for the present regard any lack of efficiency in this school, as due to a change of teachers, and trust that as the present principal becomes more familiar with the methods of instruction here, that the school will take a higher stand.

Col. Parker had been connected with the school for a long time, and was so popular with the scholars that it would be strange if any new teacher should give satisfaction for the first term.

The assistants in this school have labored faithfully, and their respective divisions have always appeared well, and they have accomplished much.

If this building was as comfortable as the Franklin St. house, we might expect better results.

The South Grammar School continues to rank among the very best. Indeed, were I disposed to find fault I should hardly know what to criticize. The discipline of the school is as good as we could ask. The instruction is of a high order; a feeling of activity pervades the school, and the scholars well understand the branches which are taught.

One thing tends to the efficiency of the school, and that is the order on the stairs, in the entries, and in fact in and about the building, before and after school and at recess time.

This is a matter which is too often overlooked by teachers, although it is of great importance, and has much to do with the di-

scipline of a school. Teachers should prevent disorder in any part of the school building no matter whether the school is in session or not.

I have no doubt as to the success of this school while it remains under the management of the present teachers.

The Park St. Grammar School continues under the charge of the same principal with the same success as formerly.

The Grammar School at Piscataquog is doing well under the charge of its present principal. It is a school requiring a good deal of labor to manage, but the teacher at the head of it is succeeding well.

The Grammar School at Amoskeag during the past two terms I think, has made the greatest improvement of any school in the city, and although it is not yet a first-class school it is due to the fact that it was in such a condition when Mr. Dutton took charge of it, rather than from any lack of ability or inclination on his part.

The East Grammar School which was organized the past year is in a flourishing condition, although the frequent change of teachers in the higher division has operated unfavorably.

MIDDLE SCHOOLS.

These schools have always been regarded as among our very best, and at the present time I think they sustain their former reputation.

There has been considerable complaint with regard to the school at Wilson's Hill, but with that exception this grade of schools has been satisfactory.

PRIMARY SCHOOLS.

During the first term of the year there were twenty-three schools of this grade in the Central District, three in Ward 7 and one in Ward 8. At the present time there are nineteen in the whole city, including those at Piscataquog and Amoskeag.

A new teacher was elected at the Piscataquog West Primary at the beginning of the spring term.

At the close of the summer term the teacher of the Piscataquog South Primary School who had taught this school in an acceptable manner for a number of years, resigned to assume duties elsewhere. She was succeeded by a teacher who had been remarkably successful in another district, and thus far in the new position has given good satisfaction.

The new Primary School at Amoskeag does not rank as well as the other Primary School, in the same ward—which is one of the best—and probably never will in its present quarters.

A new teacher was elected to one of the Spring St. Primaries at the beginning of the spring term

Owing to changes made in the old High School building these schools do not maintain a high rank.

The instruction in our Primary schools is good and this grade of school is now receiving more attention than formerly. In those schools where much oral instruction has been given the progress has been most rapid. I do not wish to see any of the schools neglected, but I think that the Primary require considerable attention from the members of the Board,

I cannot too strongly urge the importance of securing the best of teachers for Primary schools. It is a mistaken idea that any one can teach a school of this grade. The highest talent is needed for this grade of schools; it is much easier to obtain a good Grammar School teacher than one well fitted to teach a Primary school,

The following extract from the report of a town in Massachusetts, I consider so well timed that I insert it;

“It is no more important that the High School should be in good condition than that the Primary Schools should be. In them is formed the child's first impression of school life and study. The bias the tone of the first term here may characterize the whole of the child's future.

Correct enunciation, promptness, quiet and cheerful obedience, dexterity of hand, even the proper carriage of the person, must in three cases out of four be learned in the Primary if in any school. Let the reader consider whether the best qualities of a teacher are not required in such schools, and whether such qualities do not deserve to be well paid.

Several years ago the accomplished and able lady now at the head of the Boston Training School, was induced to leave Oswego and take an assistant's place in a Boston Grammar School. After filling her new place awhile, very much to the satisfaction of her employers, she said to the superintendent, 'Sir, I cannot stay in Boston unless I am promoted.' Not understanding whither she could expect to be promoted from the good place she already had he asked what she desired. 'Why, Sir,' said she, 'I prepared myself with great labor, to teach, and am fitted for something better than a Grammar School. I want to be promoted to something of more consequence—to a Primary School.'

And she got her promotion. Her school soon became the admiration of all who knew it, and it was soon felt that she must teach teachers in the Training School.

Let it not be supposed that the older grades of school are less but that the Primary schools are more important, in the estimation of the present committee, than the popular voice proclaims."

RURAL SCHOOLS

With the exception of the teachers at Hallsville, no school in the rural districts has the same teacher as last winter.

Last year I spoke of the importance of continuing the same teachers in these schools for as long a time as possible.

The Hallsville school is the most prosperous of any of the rural schools and no doubt will continue to be so as long as the present principal has charge of it.

While we cannot expect to secure such good teachers in all the suburban schools, we can have better results in many of them by employing permanent teachers in these districts.

Since the division of the Bakersville school, both divisions there have accomplished much.

A new principal has just been elected to the Bakersville school, the former principal having been transferred to the Intermediate School.

At Goff's Falls there is a new teacher. All the other suburban schools have the same teachers as last term.

SCHOOL STATISTICS FOR 1868.

1. Whole No. different pupils enrolled during the year,	4,371
2. Average No. pupils belonging to the schools,	2,654
3. Average daily attendance,	2,428
4. Average No. teachers employed during year 1868,	63
5. " " " " " " " " 1867,	65
6. No. of visits by members of School Board,	399
7. No. visits by Superintendent,	1,115
8. No. visits by citizens and others,	5,269
9. No diplomas conferred at High School,	14
10. No. diplomas conferred at Grammar Schools,	57
11. Salary of Principal of High School,	\$1,800 00
12. Salary of 1st Assistant at High School,	600 00
13. Salary of 2nd Assistant at High School,	500 00
14. Salary of Principal of Grammar Schools,	1,300 00
15. Salary of Assistants of Grammar Schools,	400 00
16. Salary of Middle and Primary School teachers,	400 00
17. No. of weeks in school year,	40
18. No. of schools,	45
19. No. of teachers,	59
20. School appropriation for past year,	\$38,000 00
21. Whole No. seats in all the schools in the city,	3,105

A great deal of difficulty is experienced in obtaining correct reports and in furnishing reliable statistics. The same complaint is made in other places and school reports show that there is a lack of uniformity in keeping school records.

All of our schools are furnished with the same kind of registers and blanks which are to be filled out and returned to the Board.

From these returns we obtain statistics with regard to the attendance at the different schools and many other items which should be included in a school report. Each teacher should pay special attention to this matter and see that all blanks in the registers are properly filled so that there will be a uniformity in the reports.

The records of a school should be kept in such a manner that if there is a change of teachers during the year, the annual report can be made by the last teacher without any difficulty, but it sometimes happens that a new teacher is unable to make a correct report from the records of the previous one.

Teachers may have a better method of making returns than the one required by the Committee but they should use the method adopted for the sake of uniformity.

The average number of scholars belonging to a school is an item to be reported monthly by each teacher, and the same should be in every annual report. In the printed regulations directions are given for finding this, but frequently it is incorrectly reported, and so much difficulty was experienced last year in obtaining this item, that it could not be given for the year 1867.

The returns of several of the schools for the past year, are incomplete, as new teachers have been unable to find the records of previous terms. Reports are to be made to the State Superintendent, and it is desirable that they be correct. I trust that there will hereafter be a uniformity in the reports.

CONCLUSION.

Thus I have attempted to give a report of the schools of this city for the past year. We contemplate with satisfaction the history of the past, yet we must not rest satisfied with what has been done.

Every age has its duties, and we owe it to those who shall follow us, that this school system of which we are so justly proud, shall be improved by having been under our care. We did not originate the system; it was bequeathed to us, and we should strive to improve it so that others may have the benefit of our experience. It is the grand feature of the system that it provides for the education of every child in the community; that the property of all shall be applied for the education of all.

Said Daniel Webster, "For the purpose of public instruction, we hold every man subject to taxation, in proportion to his property, and we look not to the question whether he himself, have or have not children to be benefitted by the education for which he pays. It is every poor man's undoubted birthright, it is the great blessing which this constitution has secured to him, it is his solace in life, and it may well be his consolation in death, that his country stands pledged, by the faith which it has plighted to all its citizens, to protect his children from ignorance, barbarism and vice."

Our schools are for the benefit of all sects and all parties, and every child in the community is entitled to the blessings of free schools. The poorest and the richest must have in them the same privileges.

There are imperfections in our school system, and what institution is free from them? When we consider the high aim, the purposes of our schools, we cannot too highly estimate their importance. Who can picture the splendor of that state in which the people are all educated, or the shame and degradation in that community where but a small proportion of the people are educated? The three thousand children now in our schools will soon occupy positions of trust and honor, and thus the character of the schools of our city to-day, affects the future welfare of our country.

Let us then for the coming year labor more earnestly, and spare no effort to improve the public schools of this city.

JOSEPH G. EDGERLY,

Superintendent of Public Instruction.

MANCHESTER, N. H., Dec. 8th, 1868.
